

Université Libre de Bruxelles (ULB) - Faculté de Médecine

Universiteit Gent (Ugent) – Faculteit Diergeneeskunde

Molecular Epidemiology of Livestock-associated *Staphylococcus aureus* in Animal and Human Populations in Belgium

Stien Vandendriessche

Reference Laboratory for Staphylococci – MRSA, Hopital Erasme, Faculty of Medicine, ULB

Department of Pathology, Bacteriology and Avian Diseases, Faculty of Veterinary Medicine, Ugent

Thesis submitted in fulfilment of the requirements for the degree of Doctor (PhD) in
Biomedical Sciences (ULB) – Veterinary Sciences (Ugent)

2012

Promoters: Prof. dr. Marc Struelens (ULB), Prof. dr. Freddy Haesebrouck (UGent)

Co-promoter: Prof. dr. Olivier Denis (ULB)

TABLE OF CONTENTS

List of Tables.....	iii
List of Figures.....	iv
List of Abbreviations.....	v
1. Summary	3
2. Introduction - Review of the literature.....	5
2.1. Microbiology of <i>Staphylococcus aureus</i>.....	7
2.1.1. Taxonomy.....	7
2.1.2. Genome composition.....	7
2.1.2.1. Core genome.....	9
2.1.2.2. Mobile genetic elements.....	10
2.1.2.2.1. Bacteriophages.....	11
2.1.2.2.2. Staphylococcal pathogenicity islands (SaPi).....	11
2.1.2.2.3. Genomic islands (GI).....	11
2.1.2.2.4. Plasmids.....	12
2.1.2.2.5. Insertion sequences	12
2.1.2.2.6. Transposons	12
2.1.2.2.7. Staphylococcal cassette chromosome (SCC) elements....	13
2.1.3. Pathogenicity.....	17
2.1.3.1. Virulence factors	17
2.1.3.2. Regulation of virulence.....	19
2.1.4. Antibiotic resistance determinants.....	21
2.1.4.1. β -lactams.....	21
2.1.4.2. Glycopeptides.....	25
2.1.4.3. Macrolides, Lincosamides and Streptogramins	26
2.1.4.4. Oxazolidinones.....	29
2.1.4.5. Aminoglycosides (including aminocyclitols).....	29
2.1.4.6. Tetracyclines.....	30
2.1.4.7. Fluoroquinolones.....	31
2.1.4.8. Sulfonamides and trimethoprim.....	31
2.1.4.9. Other antimicrobial agents	32
2.1.4.9.1. Phenicols.....	32
2.1.4.9.2. Pleuromutilins.....	33
2.1.4.9.3. Mupirocin.....	33
2.1.4.9.4. Fusidic acid.....	33
2.1.4.9.5. Rifampicin.....	33
2.1.4.9.6. Resistance to heavy metals.....	34
2.2. Identification and typing of <i>Staphylococcus aureus</i>.....	35
2.2.1. Detection, identification and antimicrobial susceptibility testing.....	35
2.2.2. Molecular Typing.....	36
2.2.2.1. Pulsed-field gel electrophoresis.....	37
2.2.2.2. <i>spa</i> typing.....	39

2.2.2.3.	Multi-locus sequence typing.....	40
2.2.2.4.	SCCmec typing.....	41
2.3.	Epidemiology of <i>Staphylococcus aureus</i>	47
2.3.1.	Ecology and clinical manifestations	43
2.3.1.1.	In humans.....	43
2.3.1.2.	In animals.....	43
2.3.2.	Population structure of <i>S. aureus</i> in humans and animals.....	46
2.3.3.	Molecular epidemiology of methicillin-resistant <i>S. aureus</i> in humans	51
2.3.3.1.	Healthcare-associated MRSA (HA-MRSA).....	51
2.3.3.2.	Community-associated MRSA (CA-MRSA).....	54
2.3.3.3.	Livestock-associated MRSA (LA-MRSA).....	57
2.3.3.3.1.	In humans.....	59
2.3.3.3.2.	In animals.....	59
3.	Objectives	65
4.	Materials and Methods	69
5.	Results	71
5.1.	Prevalence and genetic diversity of methicillin-resistant <i>Staphylococcus aureus</i> carried by humans and animals across livestock production sectors.....	73
5.2.	Large variation of methicillin-susceptible <i>Staphylococcus aureus</i> genotypes (MSSA) in humans and animals on livestock farms and loss of SCCmec DNA in porcine MSSA CC398 due to recombination....	89
5.3.	Previous healthcare exposure is the main antecedent for methicillin-resistant <i>Staphylococcus aureus</i> carriage on hospital admission in Belgium	111
5.4.	Methicillin-susceptible <i>Staphylococcus aureus</i> ST398-t571 harbouring the macrolide, lincosamide, streptogramin B resistance gene <i>erm</i> (T) in Belgian hospitals.....	135
6.	General discussion	151
7.	Conclusions and perspectives	169
8.	Reference List	173
9.	Thèse annexe	213
	Acknowledgements	215
	Curriculum vitae	217
