

Table of contents

Abbreviations & symbols	1
Chapter 1. Introduction	2
1. Supramolecular Chemistry	3
2. Anion recognition	5
3. Fluoride recognition	7
4. Uranyl-salophen receptors	9
5. Micellar incorporation of molecular receptors	12
5.1. Characteristics of micelles	12
5.2. State of the art	16
5.2.1. Receptors which are not soluble in water	16
5.2.2. Receptors which are already active in water	22
5.2.3. Comicellization	24
6. Outline of the thesis	26
7. Bibliography	27
Chapter 2. Use of PRE measurements to locate receptors in micelles	37
1. Introduction	38
2. Summary of Published Results	43
3. Further experiments	44
4. Conclusions	45
5. Materials and methods	45
5.1. Preparation of the gadolinium solution	45
5.2. Solution for PRE experiments	45
5.3. NMR Spectroscopy	45
6. Bibliography	46
Chapter 3. Fluoride binding with micellar nanodevices based on salophen complexes	57
1. Introduction	58
2. Summary of published results	59
3. Effect of surfactant concentration on the performance of the nanodevices	61
3.1. CTACl systems	61
3.2. Zwitterionic SB3-14 surfactant	65

4. Conclusions.....	67
5. Materials and methods.....	67
6. Bibliography.....	68
Chapter 4. Micellar incorporation of different receptors.....	85
1. Introduction.....	86
2. Uranyl-salen and salophen	87
2.1. Uranyl-salen A.....	87
2.2. Uranyl-salophen B.....	89
3. Boranes.....	90
4. Hydrogen-bonding receptors	92
5. Conclusions.....	95
6. Materials and methods.....	95
6.1. Chemicals	95
6.2. Synthesis of receptor C.....	96
6.3. Incorporation of receptors.....	97
6.4. UV-vis spectroscopy.....	97
6.5. NMR Spectroscopy	97
7. Bibliography.....	97
Chapter 5. Conclusions.....	99
Appendix A.....	104
Appendix B. Titration of Receptor 1 in CTACl micelles.....	107
Appendix C. DLS measurements on 5 mM CTACl micelles	114
Appendix D. Titration of receptor 1 in SB3-14 micelles.....	115
Appendix E. DLS measurements on SB3-14 micelles	117
Appendix F. Titration of receptor A in CH ₂ Cl ₂	118
Appendix G. Titration of receptors D-G in DPC	121
