<b>1. Introduction</b>	<b>1</b>
1.1. Structural Optimization of Modal Filters . . . . .	2
1.2. Parametric Level Set Approach . . . . .	3
1.3. Literature Overview . . . . .	4
1.3.1. Distributed Modal Filters for Two-Dimensional Structures	4
1.3.2. Parametric Level Set Methods . . . . .	5
1.4. Aim of the Thesis . . . . .	5
1.5. Outline of the Work . . . . .	6
<b>2. PVDF Modal Sensors</b>	<b>9</b>
2.1. Vibration and Modal Decomposition . . . . .	9
2.2. Spatial Modal Filtering . . . . .	11
2.3. Sensor Output Model . . . . .	12
2.3.1. Piezoelectricity . . . . .	13
2.3.2. Piezoelectric Constitutive Equations . . . . .	14
2.3.3. Distributed PVDF Transducers . . . . .	15
2.3.4. Sensor Equation for Plate Structures . . . . .	16
2.4. Distributed PVDF Modal Sensors for Plate Structures . . . . .	19
2.4.1. One-Dimensional Distributed Modal Sensors . . . . .	21
2.4.2. Two-dimensional Distributed Modal Sensors . . . . .	23
2.4.3. Modal Sensor Structural Optimization Problem . . . . .	25
<b>3. Explicit Parametric Level Set Method</b>	<b>29</b>
3.1. Structural Optimization . . . . .	30
3.1.1. Shape Sensitivity Analysis . . . . .	33
3.1.2. Topology Sensitivity Analysis . . . . .	35
3.2. Level Set Method . . . . .	36
3.2.1. Implicit Domain Representation . . . . .	36
3.2.2. Level Set Evolution . . . . .	37
3.2.3. Structural Optimization by the Level Set Method . . . . .	39
3.3. Parametrization of the Level Set Function . . . . .	40
3.3.1. Geometric Parametrization . . . . .	41
3.3.2. Free-Form Parametrization . . . . .	42

3.4.	Radial Basis Functions . . . . .	44
3.4.1.	Characteristics with respect to Shape Optimization . . .	45
3.4.2.	Gaussian RBF . . . . .	48
3.5.	Explicit Updating Approach . . . . .	50
3.5.1.	Explicit Parametric MSA Optimization Problem . . . . .	51
3.5.2.	Existence of Solutions . . . . .	52
3.5.3.	Practical Considerations . . . . .	52
<b>4.</b>	<b>Derivative-Free Explicit Updating</b>	<b>55</b>
4.1.	Differential Evolution . . . . .	56
4.2.	Numerical Specifications . . . . .	58
4.3.	Numerical Results . . . . .	61
4.4.	Conclusion . . . . .	65
<b>5.</b>	<b>Sensitivity-Based Explicit Updating</b>	<b>67</b>
5.1.	Computation of Shape Sensitivities . . . . .	67
5.1.1.	Parametric Shape Derivative . . . . .	68
5.1.2.	Partial Derivatives of the Gaussian RBF . . . . .	69
5.2.	Existence of the Parametric Shape Derivative . . . . .	71
5.3.	Sequential Least Squares Quadratic Programming . . . . .	74
5.4.	Numerical Results . . . . .	76
5.4.1.	Designs for Different Number of Filtered Modes . . . . .	76
5.4.2.	Dependence on Initial Design . . . . .	84
5.4.3.	Influence of Parameters . . . . .	87
5.4.4.	Comparison to the element-based topology optimization approach . . . . .	88
5.5.	Conclusion . . . . .	89
<b>6.</b>	<b>Multiple Level Sets</b>	<b>91</b>
6.1.	Representation of Multiple Materials . . . . .	93
6.1.1.	Polarization over Material . . . . .	93
6.1.2.	Material over Polarization . . . . .	94
6.2.	Numerical Results . . . . .	96
6.2.1.	Influence of Representation Scheme . . . . .	97
6.2.2.	Inclusion of a Volume Constraint . . . . .	98
6.3.	Conclusion . . . . .	100
<b>7.</b>	<b>Conclusion and Outlook</b>	<b>103</b>
7.1.	Summary and Conclusion . . . . .	103
7.2.	Recommendations for Future Work . . . . .	105
<b>A.</b>	<b>Modeshapes of SS Plate</b>	<b>107</b>
<b>B.</b>	<b>Modeshapes of CS Plate</b>	<b>113</b>

<b>C. Shape Derivative of Area</b>	<b>119</b>
C.1. Polarization over Material Representation . . . . .	119
C.2. Material over Polarization Representation . . . . .	120
<b>D. Riesz Representation and Hadamard Structure Theorem</b>	<b>121</b>
