

Contents

Contents	ix
List of Figures	xi
List of Tables	xxi
List of Symbols	xxiii
1 General Introduction	1
References	9
2 Theoretical Background on Piezoelectric Material Modeling	11
1 Origin of Piezoelectricity	11
2 Linear Piezoelectricity	14
3 Finite Element Modeling of Piezoelectric elements	24
4 1D Piezoelectric Modeling	27
5 Cylindrical Piezoelectric Modeling	36
6 Composite Piezoceramic	46
7 Conclusions of the Chapter	56
References	56
3 Theoretical Background on Wave Propagation	63
1 1D Wave propagation in stratified media	63
2 Modeling Infinite Media	71
3 Wave Propagation in Scattered Media	95
4 Some Properties of Wave Propagation	102
References	106
4 Real-Time Monitoring of Concrete Behavior	111
1 Introduction	111
2 State of the Art on Ultrasonic Monitoring Methods	112
A Article: On-line monitoring of cracking in concrete structure using embedded piezoelectric transducers	117
3 Design of a New Monitoring System	133
4 Application of the New System to Fast and Real Time Monitoring	143
5 Limits of the Early Age Damage Index: Towards the Development of a new Index for Damage Monitoring	149

6	From Early Age Monitoring to Damage Detection	162
7	Conclusions of the Chapter	172
	References	172
5	Design of Embedded Piezoelectric Transducers	183
1	Introduction	183
2	State of the Art on Embedded Piezoelectric Transducers	184
B	Article: Design optimization of embedded ultrasonic transducers for concrete structures assessment	187
3	Additional Remarks on Dynamics of External and Embedded Transducers	219
4	Conclusions	220
	References	221
6	General Conclusion	231
	References	232
7	Prospects	233
	References	238
	Appendices	239
A	Piezoelectric Properties from Databases	241
1	Introduction	241
2	Meggitt (Ferroperm Pz26)	241
3	CeramTec Sonox P505	244
B	Complements on Composite Piezoelectric Modeling	249
1	Analytical model for 1-3 composites	249
2	Numerical	251
	References	251
C	Reciprocity theorem in elastodynamics and piezoelectricity	257
1	Elastodynamic	257
2	Piezoelectricity	258
	Author's Bibliography	259
