

Contents

General Introduction	1
<i>Biodiversity and oceans</i>	
<i>Laws of evolution</i>	
<i>Mitochondrial DNA</i>	
<i>Melarhaphe neritoides</i>	
<i>The North East Atlantic and the Azores</i>	
<i>Measuring genetic variation, elucidating evolutionary processes</i>	
Objectives and Outline	27
Chapter 1	31
<i>Mitochondrial DNA hyperdiversity and its potential causes in the marine periwinkle Melarhaphe neritoides (Mollusca: Gastropoda)</i>	
Chapter 2	75
<i>Implications of mtDNA hyperdiversity for assessing population genetic differentiation and connectivity: deceiving haplotypic differentiation in a panmictic periwinkle in the North East Atlantic</i>	
Chapter 3	112
<i>Comparative mitogenomics of Littorinidae (Mollusca: Gastropoda) and molecular phylogeny of Littorinimorpha</i>	
General Discussion	139
Glossary	159
References	165
Curriculum vitae	193
