

# Applications of Copper Catalysis in the Total Synthesis of Macrocyclic Alkaloids and the Development of a Novel Domino Process

## Contents

---

### Abbreviation

<b>General introduction</b> .....	1
<b>List of publications</b> .....	5
<b>Primary part:</b> .....	7
<b>Chapter 1: Copper-catalyzed formation of C(sp<sup>2</sup>)-O and C(sp<sup>2</sup>)-N bonds in natural product synthesis</b> .....	7
1 The development of copper catalysis.....	7
1.1 The discovery of copper catalysis.....	7
1.2 Further development of copper catalysis.....	8
1.3 Renaissance of copper catalysis.....	10
1.4 Plausible mechanism of Ullmann-type cross coupling reaction.....	12
2 Metal-mediated C-O bond forming reactions in natural product synthesis.....	13
2.1 Metal-mediated synthesis of naturally occurring diary ethers.....	15
2.1.1 Synthesis of naturally occurring diaryl ethers based on intermolecular Buchwald- Hartwig and Ullmann reactions.....	15
2.1.2 Synthesis of naturally occurring diaryl ethers based on intramolecular Ullmann reactions .....	25
2.1.3 Synthesis of naturally occurring diaryl ethers based on intermolecular Chan-Lam-Evans reactions .....	34
2.1.4 Synthesis of naturally occurring diaryl ethers based on intramolecular Chan-Lam- Evans reactions .....	37
2.2 Copper-mediated synthesis of naturally occurring aryl alkyl ethers .....	40
2.2.1 Synthesis of naturally occurring aryl alkyl ethers based on intermolecular Ullmann and Chan-Lam-Evans reactions .....	40
2.2.2 The intramolecular aliphatic Ullmann reaction in total synthesis .....	42
2.3 Copper-mediated intramolecular arylation of carboxylic acids in total synthesis .....	45
3 Copper-mediated vinyl amidation in natural product synthesis .....	47

3.1 Copper-mediated intermolecular enamidation in natural product synthesis .....	47
3.1.1 CuTC-mediated intermolecular enamidation .....	47
3.1.2 Phenanthroline derivatives-assisted, CuTC-mediated intermolecular enamidation	49
3.1.3 Amino acids-assisted copper-mediated intermolecular enamidation .....	51
3.1.4 Diamine-assisted copper-mediated intermolecular enamidation .....	53
3.2 Copper-mediated intramolecular enamidation in natural product synthesis .....	57
3.2.1 Copper-mediated synthesis of enamide-containing medium cycles in natural products .....	58
3.2.2 Copper-mediated synthesis of enamide-containing macrocycles in natural products .....	59

## **Chapter 2: Total synthesis of (-)-melanthioidine .....**

1 Introduction .....	63
1.1 Dimeric macrocyclic diary ether tetrahydroisoquinoline alkaloids .....	63
1.2 (-)-Melanthioidine .....	63
1.2.1 Isolation and identification of (-)-melanthioidine .....	63
1.2.2 Biosynthesis of (-)-melanthioidine .....	67
1.3 Previous total syntheses of (-)-melanthioidine .....	70
1.3.1 Total synthesis of (-)-melanthioidine by the Battersby group .....	70
1.3.2 Total synthesis of (±)-melanthioidine by the Kametani group .....	73
2 Retrosynthesis of (-)-melanthioidine .....	75
3 Total synthesis of (-)-melanthioidine .....	76
3.1 Synthesis of the precursor of the Bischler-Napieralski cyclization .....	76
3.1.1 Synthesis of the amine fragment .....	76
3.1.2 Synthesis of the acid fragment .....	77
3.1.3 Synthesis of amide 50 .....	78
3.2 Bischler-Napieralski/Noyori asymmetric hydrogenation sequence .....	78
3.2.1 Bischler-Napieralski cyclization .....	78
3.2.2 Noyori asymmetric hydrogenation .....	79
3.3 Assignment of the absolute configuration of 51 .....	85
3.4 Copper-catalyzed cyclodimerization .....	85
4 Conclusion and Perspectives .....	89

## **Chapter 3: Total synthesis of paliurine F .....**

1 Introduction .....	91
1.1 Isolation and classification of cyclopeptide alkaloids .....	91

1.2 Bioactivity of cyclopeptide alkaloids .....	92
1.2.1 Antimicrobial and antiviral activities .....	93
1.2.2 Antiplasmodial activity .....	94
1.2.3 Activities on the Central Nervous System (CNS) .....	97
1.2.4 Other activities .....	98
1.3 Biosynthesis of cyclopeptide alkaloids .....	98
1.4 Synthesis of cyclopeptide alkaloids .....	99
2 Paliurine F .....	111
2.1 Isolation and biological activities of paliurine F .....	111
2.2 Previous total synthesis of paliurine F .....	112
3 Retrosynthesis of paliurine F .....	113
4 Results and discussion .....	114
4.1 Synthesis of the bis-halogenated precursor .....	114
4.2 Synthesis of the dipeptide fragment .....	116
4.3 Double copper-mediated double coupling reaction .....	116
4.3.1 First attempts at double coupling .....	116
4.3.2 Coupling with model substrates .....	117
4.3.2.1 Model studies with a dehydroxy fragment .....	117
4.3.2.2 Model studies with a dehydroxy fragment in the presence of an additional alcohol: aiming at a diastereospecific enamidation .....	120
4.3.3 Coupling with model substrates: aiming at a diastereospecific enamidation .....	122
4.4 Macrocyclization .....	124
4.5 One-pot double cross-coupling toward macrocycle 85 .....	128
4.6 Completion of the synthesis of paliurine F .....	130
5 Conclusion and perspectives .....	130

## **Chapter 4: Copper-catalyzed domino double Ullmann coupling-double Claisen rearrangement .....**

1 Introduction .....	133
1.1 The Claisen rearrangement and its variations .....	133
1.2 Applications of double Claisen rearrangements for the developments of new synthetic methods .....	135
1.2.1 Double Claisen rearrangements based on aryl allyl ethers .....	135
1.2.2 Double Claisen rearrangement based on vinyl allyl ethers .....	140
1.3 Double Claisen rearrangements in the total synthesis of natural and/or active biologically relevant products .....	142

2 Objectives .....	145
3 Optimization of the reaction conditions .....	146
3.1 Optimization of the double Ullmann coupling/mono-Claisen rearrangement .....	148
3.2 Optimization of the second Claisen rearrangement .....	150
4 Scope and limitation studies .....	152
4.1 Study of the scope and limitations with respect to the starting ene-diols .....	152
4.1.1 Preparation of ene-diols 71 .....	152
4.1.1.1 Synthesis of racemic ene-diols .....	152
4.1.1.2 Synthesis of enantiopure ene-diols .....	153
4.1.2 Copper-catalyzed domino double Ullmann coupling-mono-Claisen rearrangement	157
4.1.3 Microwave-promoted second Claisen rearrangement .....	160
4.2 Study of the scope and limitations with respect to the starting alkenyl iodides .....	162
4.2.1 Preparation of the starting vinyl iodides .....	162
4.2.2 Study of the scope and limitations with respect to the starting alkenyl iodides .....	163
5 Conclusion and perspectives .....	164
<b>General conclusion and perspectives</b> .....	165
<b>Experimental part: General information</b> .....	169
<b>Experimental part of chapter 2</b> .....	170
<b>Experimental part of chapter 3</b> .....	181
<b>Experimental part of chapter 4</b> .....	189
