NOMENCLATURE	xix
Acronyms	xxi
Roman Symbols	xxii
Greek Symbols	xxiii
Subscripts	xxiii
I Humidification of micro gas turbines	1
1 INTRODUCTION	3
1.1 The micro gas turbine cycle and its main limitations	5
1.2 Water injection in micro gas turbines	7
1.3 Research objectives and methodology	7
2 LITERATURE REVIEW	9
2.1 State-of-the-art micro gas turbines	9
2.2 Advantage of humidifying the mGT cycle	11
2.3 Humidified mGT cycles	12
2.4 Limitations of the humidified mGT	20
2.5 Conclusion	24
II Numerical Analysis	25
3 FIRST AND SECOND LAW ANALYSES OF MGT AND MHAT	27
3.1 Methodology	28
3.2 Results	30
3.3 Conclusions	38
4 TRANSIENT SIMULATIONS	41
4.1 Methodology: the dynamic model in TRANSEO	42
4.2 Model validation with wet experimental data	43
4.3 Transient simulation results	48
4.4 Conclusions	56

III	Experimental Analysis	57
5	THE T100 mHAT FACILITY AT VUB	59
5.1	T100 mHAT setup	60
5.2	The T100 mHAT humidification unit	63
5.3	Start-up and shutdown procedures with water injection	65
5.4	Limitations of the T100 mHAT facility	65
6	EXPERIMENTAL RESULTS: WATER INJECTION AT FULL LOAD	67
6.1	Results at constant required power output	68
6.2	mHAT operation improvement	73
6.3	Results at constant rotational speed	75
6.4	Conclusions	81
IV	Economic Analysis	83
7	THE ECONOMIC MODEL	85
7.1	The three studied technologies	86
7.2	Demand sizing	88
7.3	Operation of the units in the model	88
7.4	Net Present Value and Internal Rate of Return	93
7.5	Definition of the costs and benefits for the evaluated technologies	94
7.6	Primary Energy Savings	96
8	RESULTS FOR A RANGE OF ELECTRICITY AND GAS PRICE SCENARIOS	97
8.1	The studied users and their demands	98
8.2	Price scenarios	99
8.3	Results	99
8.4	Conclusions	109
9	RESULTS TAKING INTO ACCOUNT EUROPEAN COGENERATION SUBSIDIES	111
9.1	The studied users and their demands	112
9.2	Electricity and gas prices	112
9.3	Policies	114
9.4	Results	119
9.5	Conclusions	127

10	CONCLUSIONS	129
10.1	Numerical analysis	129
10.2	Experimental analysis	131
10.3	Economic Analysis	131
10.4	Future work	132
10.5	Prospects of distributed cogeneration in Europe	133
