1	Introduction	1
2	Bargaining	5
2.1	Introduction	6
2.2	Literature Review	8
2.3	LATE With Mismeasured or Misspecified Treatment	12
2.3.1	Set Up and Identification	12
2.3.2	The MR-LATE Estimator and Examples	15
2.3.3	Monte Carlo Simulations	19
2.4	Women’s Intra-household Power and Family Health	23
2.4.1	Modeling Resource Shares	24
2.4.2	Estimating the Unobserved Treatment and MR-LATE	26
2.4.3	Data	27
2.4.4	Empirical Results	30
2.4.5	External Validity	34
2.5	Conclusion	34
2.6	Appendix of Chapter 2	36
2.6.1	Proof of Theorem 1	36
2.6.2	A Graphical Illustration	37
2.6.3	Additional Results: Alternative Measures of Power	37
2.6.4	Derivation of Household Demand Equations of Private Assignable Goods	40
2.6.5	External Validity of LATE	42
2.6.6	Additional Figures and Tables	45
3	Sharing	59
3.1	Introduction	60
3.2	Literature review	63
3.3	Theoretical Framework	64
3.3.1	The collective model and resource shares	64
3.3.2	Trade-off potential in DLP: resource shares versus tastes	68
3.3.3	The implications: trade-offs in a simulation study	70
3.4	Estimation Strategy	73

3.4.1	Stabilization of mean resource shares	73
3.4.2	Choosing the shrinkage parameter λ	77
3.4.3	Covariance Restriction	77
3.4.4	Asymptotic Behaviour	79
3.4.5	Performance in simulations	80
3.5	Application using the Mexican Family Life Survey (MxFLS)	82
3.5.1	Data, sample selection and descriptive statistics	83
3.5.2	Parameter estimates	84
3.5.3	Resource Shares and Poverty	86
3.6	Conclusion	88
3.7	Appendix of Chapter 3	92
3.7.1	Correlated Pseudo-regressors	92
3.7.2	Additional results	93
4	Preferences	97
4.1	Introduction	98
4.2	Theoretical framework	100
4.3	Empirical implementation	102
4.3.1	Program design, sample selection and descriptive statistics	103
4.3.2	Distribution factors	105
4.3.3	Functional forms	106
4.3.4	Endogeneity	107
4.4	Results	108
4.4.1	Does the collective model rationalize the data?	109
4.4.2	Reconciling the results with the existing literature	113
4.4.3	How can we rationalize these results?	113
4.5	Conclusion	115
4.6	Appendix of Chapter 4	118
4.6.1	Summary statistics	118
4.6.2	Distribution factors: details	119
4.6.3	First stage regressions	121
4.6.4	Replicating Attanasio and Lechene (2014)	122
4.6.5	Discussion: QAIDS versus ℓ -QAIDS	124
4.6.6	Fit of the data	130
5	Conclusion	131
