List of Tables **x**

1 The role of local institutions in the decentralization process **1**
1 Introduction . . . 1
2 Decentralization in fragile states . . . 3
3 Decentralization and inter-jurisdictional coordination . . . 5

2 From rebellion to electoral violence: evidence from Burundi **9**
1 Decentralization as a tool for post-war reconstruction in Burundi . . . 11
2 Conceptual framework . . . 14
3 Identification strategy . . . 16
3.1 Data . . . 16
3.2 Estimation method . . . 20
3.3 Causal chain and bad controls . . . 23
4 Results . . . 23
4.1 Benchmark results . . . 24
4.2 Heterogenous effects . . . 29
5 Discussion . . . 31
5.1 Reconciling theoretical and empirical evidence . . . 31
5.2 Is electoral violence different from other types of violence? . . . 32
5.3 Are the results robust? . . . 34
6 Concluding remarks . . . 34

Appendix **37**

3 Interjurisdictional coordination and access to sanitation in Brazil **51**
1 Introduction . . . 51
2 Decentralization and coordinated provision of sanitation services in Brazil . . . 53
3 Conceptual framework . . . 54
4 Data . . . 58
4.1 Dependent and independent variables . . . 58
4.2 Definition of "neighboring municipalities" and sample selection 60
5 Empirical analysis . . . 63
5.1 Identifying assumption . . . 63
5.2 Estimation of the treatment effect . . . 66
6 Results . . . 70

7 Robustness test . . . 72
8 Conclusion . . . 74

Appendix **77**

4 Decentralization, accountability and crime prevention **79**
1 Introduction . . . 79
2 Institutional framework: mayors and police management in Belgium . 82
2.1 Background: local institutions and politics in Belgium . . . 83
2.2 The 2005 reform introducing direct election of mayors in Wallonia . . . 84
2.3 The governance of local police . . . 87
3 Conceptual framework . . . 89
3.1 The effect of the reform on crime incidence in police districts with one municipality and chief of police . . . 89
3.2 The effect of the reform on crime incidence in police districts with more than one municipality and chief of police . . . 93
4 Data sources and descriptive statistics . . . 93
5 Empirical strategy . . . 98
5.1 Identification strategy . . . 98
6 Results and robustness tests . . . 101
6.1 Benchmark results . . . 102
6.2 Robustness tests . . . 103
7 Discussion . . . 107
7.1 Reconciling the results with the first hypothesis in the conceptual framework . . . 107
7.2 Reconciling the results with the second hypothesis in the conceptual framework . . . 109
7.3 Benchmark results by type of crime . . . 112
8 Conclusion and external validity . . . 113

Appendix **117**

5 Final remarks **127**

Bibliography **129**

List of Figures

2.1 Distribution of electoral violence 17
2.2 Goodness of fit of Negative Binomial and Poisson models 21
2.3 Predicted number of events in function of projected number of groups of the same size 28
2.4 Correlation matrix between variables of interest 46
2.5 Interactions: demob. rebels' polarization and Hutu share 47
2.6 Interactions: Political competition and Hutu share 48
2.7 Interactions: demob. rebels' polarization and political competition . . 49
2.8 Interactions: number of demobilized rebels and political competition . 50

3.1 A schematic representation of the conceptual framework 56
3.2 Map of access to sewerage network, municipality level 59
3.3 Outcomes of the 2008 elections, municipality level 60
3.4 Schematic representation of an average cluster of neighbors within 100 km from the core 61
3.5 Examples of clusters by "treatment status" 64
3.6 Local mean estimates with different quantile-spaced bins 67
3.7 The RD effect around the cutoff, for $h = 0.05$ 71

4.1 Direct election of mayors had been discussed since 2002, was approved in 2005 and implemented during the 2006 municipal elections 85
4.2 Police districts have their own governance framework which requires mayors to interact when several municipalities are involved 88
4.3 The positive effect of direct election on crime incidence (hypothesis 1 can be explained through two mechanisms, both of which draw from the principal-agent framework 90
4.4 Trend of average crime incidence before and after the reform and between treatment and control groups 100
4.5 Treatment effect by year (2000-2012) 103
4.6 Marginal effects of the interaction between treatment effects and the size of police districts 111
B4.1 Spatial distribution of crime incidence by municipality, average 2000-2012 124
B4.2 Evolution of the local proportion of non-Belgian residents (2000-2012), by region 124
B4.3 Evolution of covariates (2000-2012), by treatment and control groups 125

List of Tables

2.1 Parties and ex-rebel groups in post-war Burundi . . . 13
2.2 Summary Statistics . . . 18
2.3 Testing hypotheses separately and simultaneously . . . 25
2.4 Benchmark regressions - comparison of different sets of controls and different sorts of geographic fixed effects . . . 27
2.5 Heterogenous effects . . . 30
2.6 Falsification tests . . . 33
2.7 The results of Table 2.4 with demobilized rebels' variables constructed using the municipality of origin of demobilized rebels . . . 41
2.8 Testing hypotheses separately and simultaneously - OLS estimates . . 42
2.9 The results of Table 2.4 using OLS estimation . . . 43
2.10 Balancing test - regressions of variables of interest on controls, with and without geographic fixed effects . . . 44
2.11 Balancing test - regressions of variables of interest on controls, with and without geographic fixed effects (Cont'd) . . . 45

3.1 Difference in means of control variables, all samples . . . 65
3.2 Parametric fit (local linear regressions) of access to sanitation limited to close elections . . . 70
3.3 The RD effect by region . . . 72
3.4 Descriptive statistics, means difference and RD estimates for covariates in restricted sample ($h = 0.05$) . . . 73
A3.1 Testing the exogeneity of the reform . . . 77
A3.2 Non-parametric fit (local linear regressions) of access to sanitation . . 77

4.1 Average crime incidence between 2000 and 2012 by region and type of crime, municipal level . . . 95
4.2 Average social and economic characteristics and public expenditure between 2000 and 2012, municipal level . . . 96
4.3 Share of mayors that ran for re-election in 2006 and 2012, and that served for 1 or 2 legislatures. . . . 97
4.4 Testing pre-treatment parallel assumption - interaction $WAL_i \times year\ dummy$ . . . 101
4.5 Benchmark results . . . 102
4.6 Robustness test - Benchmarking results with restricted sample . . . 105
4.7 Interaction between treatment and size of the local police force . . . 109
4.8 Interaction between treatment and local expenditure in safety and crime prevention . . . 109
4.9 Interaction of the treatment effect with the size of police districts . . 110
4.10 Interaction of the treatment effect with indexes of political diversity . 112

4.11 Benchmark results by type of crime 113
A4.1 Benchmark results, all coefficients 117
A4.2 Robustness test - Balancing test for subsamples 118
A4.3 Robustness test - Clustering standard errors at different administrative levels 119
A4.4 Robustness test - Spatially clustered standard errors 120
A4.5 Robustness test - Municipal trend (linear and quadratic) 121
A4.6 Robustness test - Police district trend (linear and quadratic) 122
A4.7 Robustness test - Regional trend (linear and quadratic) 123
