Table of contents

List of figures **xiii**

List of tables **xv**

Nomenclature **xvii**

1 Introduction **1**

1.1 Background 1
1.2 Non-conventional combustion regime 1
1.3 Turbulence-chemistry interaction models 4
1.4 Kinetics reduction and tabulation for finite-rate chemistry 5
1.5 Advanced post-processing tools 6
1.6 Perspectives 7

2 Mathematical models **9**

2.1 Turbulent combustion modeling using Computational Fluid Dynamics . . . 9
2.1.1 RANS for turbulent combustion modeling 9
2.1.2 LES for turbulent combustion modeling 11
2.2 Eddy Dissipation Concept model 12
2.2.1 Finite-rate chemistry approach 14
2.2.2 Limitation of fine structure fraction 15
2.3 Partially Stirred Reactor model 15
2.3.1 Conventional PaSR model 15
2.3.2 Dynamic PaSR model 18
2.4 Implicit combustion closures for LES 20
2.4.1 Quasi-Laminar Finite Rate model 21
2.4.2 Laminar Finite Rate model 21
2.5 Comparison of different finite-rate combustion models used in RANS simulation and LES 21

2.6 Flamelet Progress Variable model in RANS 22
2.7 Chemistry reduction methods 23
2.8 Advanced post-processing tool 26
2.8.1 Computational Singular Perturbation fundamentals 26
2.8.2 Tangential Stretching Rate 28

3 Paper contributions **31**
3.1 Numerical study of the Adelaide Jet in Hot-Coflow burner by means of RANS and detailed chemistry 31
3.2 Finite-rate chemistry modelling of non-conventional combustion regimes using a Partially-Stirred Reactor closure: combustion model formulation and implementation details 32
3.3 Assessment of on-the-fly chemistry reduction and tabulation approaches for the simulation of MILD combustion 33
3.4 Numerical and experimental investigation of turbulent n-heptane jet-in-hot-coflow flames 33
3.5 Large Eddy Simulation of MILD combustion using finite rate chemistry: effect of combustion sub-grid closure 34
3.6 Large Eddy Simulation of MILD combustion with dynamic PaSR model . . 35
3.7 Computational Singular Perturbation analysis on Large Eddy Simulation of MILD combustion 35
3.8 Numerical investigation of lifted turbulent flame with PaSR and FPV models 36

4 Concluding remarks **37**

5 Selected papers **41**
5.1 Journal paper 1 41
5.2 Journal paper 2 81
5.3 Journal paper 3 120
5.4 Journal paper 4 147
5.5 Journal paper 5 185
5.6 Journal paper 6 204
5.7 Journal paper 7 241
5.8 Conference paper 8 279
