Abbreviations	10
List of figures and tables	13
Abstract	18
Introduction	20
1.The Striatum: the input nucleus of the Basal Ganglia system.....	22
1.1 The Striatum.....	22
1.1.1 Striatal neurons.....	22
1.1.1.1 Medium spiny neurons	22
1.1.1.2 Striatal interneurons.....	24
1.1.2 Striatal subregions	25
1.1.2.1 Dorsal striatum	26
1.1.2.1.1 Dorsomedial striatum.....	26
1.1.2.1.2 Dorsolateral striatum	27
1.1.2.1.3 Inputs to the dorsal striatum.....	29
1.1.2.1.4 Efferent pathways of the dorsal striatum	32
1.1.2.2 <i>Nucleus Accumbens</i>	33
1.1.2.2.1 General description	33
1.1.2.2.2 Inputs to the NAc.....	35
1.1.2.2.3 Efferent pathways.....	37
1.2 Output nuclei of the BG.....	38
1.2.1 Globus pallidus / ventral pallidum	38
1.2.2 Substantia nigra pars reticulata and pars compacta.....	39
1.2.3 Ventral tegmental area.....	39
1.2.4 Subthalamic nucleus	39
2. Decision-making behaviour	41
2.1 A brief introduction into decision-making theories and studies	41
2.2 Neural basis of decision-making	44
2.3 Behavioural tasks to evaluate decision-making processes.....	46
2.3.1 The Iowa Gambling Task (IGT) paradigm	47
2.3.2 Pavlovian-instrumental transfer (PIT).....	48
2.3.3 Effort-based decision-making protocol in a T-maze.....	50
Goals of the project	52
Materials and methods	54

1. Transgenic mouse strains.....	54
1.1 Drd1a-Cre mouse (D ₁ -Cre)	54
1.2 Adora2a-R Cre mouse (A _{2A} -Cre)	54
1.3 Rosa26-YFP mouse	55
1.4 Breeding	56
1.5 Housing conditions	57
1.6 Ethics	57
1.7 Genotyping	57
1.7.1 DNA extraction and PCR.....	57
1.7.2 Agarose gel electrophoresis.....	58
2. Surgeries	58
2.1 Anesthesia	58
2.2 Stereotaxic surgery	59
2.2.1 Apparatus and general procedure	59
2.2.2 Virus use and delivery	60
2.2.3 Post-surgery recovery	60
2.3 Intracardiac perfusion with 4% paraformaldehyde (PFA)	61
3. Chemogenetics: Designer's Receptor Exclusively Activated by Designer's Drug (DREADD) approach.....	61
4. Behavioural procedures.....	64
4.1 Iowa Gambling Task (IGT).....	64
4.1.1 Apparatus	64
4.1.2 Behavioural protocol.....	66
4.1.3 Pharmacological treatment.....	71
4.2 Open-field.....	71
4.3 Pavlovian-instrumental transfer (PIT) (adapted from Bertran-Gonzalez et al.,2013).....	72
4.3.1 Behavioural protocol.....	72
4.4 T-maze for effort-based decision-making (adapted from Solinsky and Kirby,2013).....	75
4.4.1 Behavioural protocol.....	75
5. Immunohistochemistry and image acquisition and processing	77
5.1 Brain slice preparation	77
5.2 C-fos immunostaining.....	77
5.3 GFP immunostaining	77
5.4 Microscope acquisition.....	78

6. Electrophysiological recordings	78
7. Statistical analysis	80
Results	83
1. Use of chemogenetics in the striatum	83
1.1 Transfection rates in A _{2A} -YFP and D ₁ -YFP transgenic mouse lines	83
1.2 Chemogenetic-dependent C-fos induction.....	83
1.3 Chemogenetic-dependent increase in locomotor activity in D ₁ -Cre mice injected in the DMS	84
1.4 Testing of Addgene’s chemogenetic constructs.....	84
2. Behavioural paradigms to analyse decision-making.....	92
2.1 Pavlovian-instrumental transfer	92
2.2 T-maze: effort-based decision-making.....	95
2.3 The Iowa Gambling Task.....	97
3. Study of the involvement of the striatum in decision-making processes using the IGT: analysis of behavioural and neuronal modifications	101
3.1 Behavioural analysis.....	104
3.2 Electrophysiological recordings	127
4. C-fos immunostaining analysis to validate chemogenetic-mediated activation of targeted neurons after the IGT.....	132
Discussion.....	137
