I General Introduction	1
II Theoretical background.	9
1 RP analysis of temporal profiles	10
1.1 Introduction	10
1.1.1 Temporal profiles	13
1.2 A model of rational anticipation and adaptation	16
1.2.1 Loewenstein and Prelec's model of temporal profiles	19
1.2.2 A numerical example	21
1.3 Nonparametric characterization	27
1.3.1 Rationalizability and revealed preference conditions	27
1.4 Empirical application	30
1.5 Conclusion	34
2 Non-intersecting Pareto Curves	35
2.1 Introduction	35
2.2 Notation and definitions	38
2.3 The no intersection property	39
2.4 Transferable utility	44
2.5 Applications	46
2.5.1 Two-sided matching	46
2.5.2 The Coase theorem	50
2.5.3 Becker's Rotten kid Theorem	52
2.6 Maximal admissible NIP classes	54
2.7 Conclusion	57
III Applications.	58
3 Self-financed training and the marriage.	59
3.1 Introduction	59
3.2 Data	63

3.3	Results	65
3.3.1	Robustness	73
3.4	Marriage and self-financed training: A possible mechanism	86
3.4.1	Testing the bargaining hypothesis	89
3.5	Conclusion	93
4	Intra-household insurance and leverage constraints.	94
4.1	Introduction	94
4.2	Data	98
4.3	Empirical analysis	100
4.4	Life cycle model without commitment	108
4.4.1	Parameterization	114
4.5	Identification and Estimation	119
4.6	Results	121
4.6.1	Time use and leverage based constraints	122
4.6.2	Response to income shocks	126
4.6.3	Changes in the leverage constraints	128
	Changes in the LTI limit	128
4.7	Conclusion	130
IV	General conclusion	132

A	Appendix of Chapter 1	148
A.0.1	Summary statistics	148
A.0.2	Proof of Proposition 5.	148
A.0.3	Proof of Proposition 7.	149
A.0.4	Connections between AAER, Loewenstein and Prelec and the lifecycle models	150
B	Appendix of Chapter 2	152
B.1	Proofs	152
B.2	Construction and properties of $\Gamma(\mathbf{u}, \phi)$	167
C	Appendix of Chapter 3	169
C.0.1	Summary statistics of the dataset	169
C.0.2	Intensive margin of training: counts	170
C.0.3	Training and demographics: Probit estimation	172
C.0.4	Credit constraint	173
C.0.5	Labor force attachment: cumulative measure	176

D Appendix of Chapter 4	183
D.0.6 Working hours and p-LTI	183
D.0.7 Marginal effects across LTV distribution	185
D.0.8 Age difference between spouses as distribution factor	187
D.0.9 No commitment or limited commitment	190
D.0.10 Leverage ratios and employment rates	190
D.0.11 Negative financial shocks	192
D.0.12 Wage processes	193
D.0.13 Fertility	194
D.0.14 Initial bargaining	195
D.0.15 Initial assets	195
D.0.16 Solution method	196
