

*Table of contents*

1	Introduction	17
1.1	Research context	17
1.2	Problem statement	20
1.3	Brussels as a case study	23
1.4	State of the art	24
1.5	Objectives and research questions	30
1.6	Methodology	33
1.7	Structure of the manuscript	34
1.8	Description of the study area	36
2	Urban green space qualities	41
2.1	Introduction	43
2.2	Materials and methods	45
2.3	Results	60
2.4	Discussion	69
2.5	Conclusions	73
3	Analysing urban green space accessibility and quality	79
3.1	Introduction	81
3.2	Material and methods	85
3.3	Results	97
3.4	Discussion	104
3.5	Conclusions	106
4	Exploring options for public green space development	111
4.1	Introduction	113
4.2	Concepts and materials	115
4.3	Methodology	120
4.4	Results	123
4.5	Discussion	149
4.6	Conclusions	151

5	Typology-based land cover change simulation for future ecosystem service assessment	157
5.1	Introduction	159
5.2	Materials	160
5.3	Methodology	163
5.4	Results	180
5.5	Discussion	192
5.6	Conclusions	194
6	Conclusion	198
6.1	Contribution of the research	199
6.2	Limitations of the research - data, modelling and other aspects	203
6.3	Questions for future research	204
7	References	210
8	Appendices	226
8.1	Model input maps	226
8.2	Model comparisons	227
8.3	Opportunities for green space development	229
8.4	Land cover fractions per typology	234
	List of figures	235
	List of tables	237
	Glossary	239
	List of abbreviations and acronyms	242
