<b>Abstract</b>	<b>v</b>
<b>Acknowledgements</b>	<b>vii</b>
<b>List of Figures</b>	<b>xiii</b>
<b>List of Tables</b>	<b>xxi</b>
<b>List of Acronyms</b>	<b>xxiii</b>
<b>1 Introduction</b>	<b>1</b>
1.1 The problem . . . . .	2
1.2 The motivation . . . . .	2
1.3 Thesis content . . . . .	3
<b>2 The Earth's atmosphere</b>	<b>5</b>
2.1 Basic composition . . . . .	5
2.2 Vertical structure of the atmosphere . . . . .	6
2.2.1 Vertical profiles of air pressure and air density . . . . .	6
2.2.2 Vertical profile of temperature . . . . .	8
2.3 General circulation in the atmosphere . . . . .	10
2.4 Transport and lifetimes of atmospheric constituents . . . . .	14
<b>3 Radiative transfer in the atmosphere and radiative forcing</b>	<b>19</b>
3.1 Basic concepts of radiation . . . . .	20
3.1.1 Electromagnetic spectrum . . . . .	20
3.1.2 Solid angle and polar coordinates . . . . .	21
3.1.3 Radiometric quantities . . . . .	21
3.2 Blackbody radiation and emissivity . . . . .	23
3.2.1 Blackbody radiation . . . . .	23
3.2.2 Emissivity . . . . .	25
3.3 Spectral line formation and line shape . . . . .	25
3.3.1 Energy transitions . . . . .	26
3.3.2 Transitions in polyatomic molecules: The case of O <sub>3</sub> . . . . .	28
3.3.3 Line shapes and broadening . . . . .	31

---

3.3.3.1	Pressure broadening . . . . .	31
3.3.3.2	Doppler broadening . . . . .	32
3.3.3.3	Voigt broadening . . . . .	33
3.4	Radiative transfer . . . . .	33
3.4.1	General formulation . . . . .	33
3.4.2	Beer-Bouguer-Lambert Law . . . . .	35
3.4.3	Radiative transfer in the thermal Infrared . . . . .	36
3.4.4	IR spectrum of the atmosphere . . . . .	38
3.5	Radiative forcing . . . . .	40
<b>4</b>	<b>Ozone in the atmosphere</b>	<b>45</b>
4.1	Chemistry of ozone . . . . .	45
4.1.1	Tropospheric ozone . . . . .	45
4.1.2	Stratospheric ozone . . . . .	49
4.2	Ozone distribution and seasonality . . . . .	50
4.2.1	Tropospheric ozone distribution . . . . .	50
4.2.2	Stratospheric ozone distribution . . . . .	54
4.2.3	Stratosphere - Troposphere exchange . . . . .	57
4.3	Chemistry - Climate interactions . . . . .	58
4.4	Ozone radiative forcing . . . . .	60
4.4.1	Tropospheric ozone radiative forcing . . . . .	60
4.4.2	Stratospheric ozone radiative forcing . . . . .	61
<b>5</b>	<b>Ozone infrared sounding from satellites</b>	<b>63</b>
5.1	<i>In situ</i> and remote observations . . . . .	63
5.2	Satellite observations . . . . .	65
5.3	IASI on-board Metop . . . . .	66
5.3.1	Metop payload . . . . .	67
5.3.2	The IASI instrument . . . . .	67
5.4	TES on-board Aura . . . . .	71
5.4.1	Aura characteristics . . . . .	71
5.4.2	The TES instrument . . . . .	72
<b>6</b>	<b>Ozone retrievals from IASI</b>	<b>75</b>
6.1	FORLI software for retrievals . . . . .	76
6.1.1	Look-up Tables . . . . .	76
6.1.2	Input parameters . . . . .	76
6.2	The Optimal Estimation Method . . . . .	77
6.2.1	General formulation . . . . .	78
6.2.2	Linearization . . . . .	79
6.2.3	Averaging kernels and degrees of freedom . . . . .	80
6.3	The FORLI-O <sub>3</sub> product . . . . .	81
6.3.1	Errors in FORLI-O <sub>3</sub> . . . . .	81
6.3.2	Biases in FORLI-O <sub>3</sub> . . . . .	82
6.3.3	Updated FORLI-O <sub>3</sub> product . . . . .	83
6.4	The TES O <sub>3</sub> product . . . . .	83

6.4.1	Retrieval algorithm and forward model . . . . .	83
6.4.2	Errors and biases . . . . .	84
<b>7</b>	<b>Ozone longwave radiative effect - Method development</b>	<b>85</b>
7.1	IASI instantaneous radiative kernels . . . . .	85
7.1.1	IASI–FORLI radiance Jacobians . . . . .	86
7.1.2	Angular integration of moments . . . . .	88
7.1.3	Anisotropy approximation . . . . .	88
7.1.4	Direct integration of Jacobians . . . . .	90
7.1.5	IRK comparison . . . . .	90
7.2	Longwave radiative effect . . . . .	92
7.2.1	LWRE comparison . . . . .	93
7.2.2	LWRE error characterization . . . . .	97
<b>8</b>	<b>Ozone longwave radiative effect - Spatial and temporal analysis</b>	<b>103</b>
8.1	IRK vertical distribution . . . . .	103
8.2	O <sub>3</sub> LWRE vertical and spatial distributions . . . . .	104
8.2.1	Vertical distribution . . . . .	104
8.2.2	Spatial distribution . . . . .	107
8.3	IASI-A vs IASI-B O <sub>3</sub> LWRE and product updates . . . . .	111
8.3.1	Updates in Level 1 and Level 2 IASI measurements . . . . .	111
8.4	LWRE versus O <sub>3</sub> content and surface temperature . . . . .	113
8.4.1	Relation of LWRE to O <sub>3</sub> and surface temperature . . . . .	113
8.4.2	Overview . . . . .	120
8.5	O <sub>3</sub> LWRE variations over time . . . . .	120
8.5.1	LWRE seasonality . . . . .	121
8.5.2	LWRE temporal evolution . . . . .	136
8.5.3	Focusing on individual cases . . . . .	142
8.5.4	Overview . . . . .	145
<b>9</b>	<b>LWRE: IASI vs TES vs Chemistry - Climate Models</b>	<b>147</b>
<b>10</b>	<b>Conclusions and Perspectives</b>	<b>153</b>
10.1	General Conclusions . . . . .	154
10.2	Future Work . . . . .	155
<b>A</b>	<b>The Dobson unit</b>	<b>159</b>
<b>B</b>	<b>IASI-A vs IASI-B LWRE</b>	<b>161</b>
<b>C</b>	<b>Global Distributions</b>	<b>165</b>
	<b>Bibliography</b>	<b>181</b>
