Introduction v

1 Symmetric functions 1
- 1.1 Basics . . . 1
- 1.2 Plethystic notation . . . 7
- 1.3 q-notation . . . 10
- 1.4 Macdonald polynomials . . . 13
- 1.5 A summation formula . . . 20

2 Combinatorial definitions 29
- 2.1 Lattice paths . . . 29
- 2.2 Polyominoes . . . 39

3 Delta conjectures 45
- 3.1 The shuffle conjecture . . . 45
- 3.2 The Delta conjecture . . . 46
- 3.3 The square conjecture . . . 46
- 3.4 The polyominoes conjecture . . . 47
- 3.5 Shuffle theory . . . 47

4 Combinatorial recursions 49
- 4.1 Partially labelled Dyck paths . . . 49
- 4.2 Partially labelled square paths . . . 55

5 Algebraic recursions 59
- 5.1 The family $F(m,n\backslash s)^{*k,\circ j}$ . . . 59
- 5.2 The family $S(m,n\backslash s)^{*k,\circ j}$ . . . 63

6 State of the art 67
- 6.1 The q,t-Catalan . . . 67
- 6.2 The shuffle conjecture . . . 68
- 6.3 From the shuffle to the Delta . . . 69
- 6.4 Our results . . . 70
- 6.5 Future directions . . . 71
