

Table of contents

1. INTRODUCTION	1
1.1 EARTH SULFUR CYCLE AND CLIMATE	1
1.1.1 ATMOSPHERE	1
1.1.2 LITHOSPHERE AND BIOSPHERE.....	3
1.1.3 HYDROSPHERE AND BIOSPHERE	5
1.1.4 BIOGEOCHEMICAL CYCLE OF DIMETHYLSULFIDE (DMS)	5
1.1.5 THE CLAW HYPOTHESIS, A CONTROVERSIAL LINK CONNECTING BIOSPHERE, HYDROSPHERE AND ATMOSPHERE.....	13
1.2 SEA ICE, A VERY LARGE AND KEY BIOME FOR THE POLAR OCEANS	17
1.2.1 THE FORMATION AND SEASONAL CHANGES OF THE SEA ICE BIOME	17
1.2.2 BIOLOGICAL COMMUNITIES AND THE MAIN LIVING CONSTRAINTS IN SEA ICE	22
1.2.3 GASEOUS INCLUSIONS	26
1.2.4 DMS CYCLE IN THE SEA ICE HABITAT.....	26
1.3 STUDY CASE.....	28
1.3.1 FRAGILARIOPSIS CYLINDRUS	28
1.3.2 PHAEOCYSTIS ANTARCTICA	31
1.4 RESEARCH OBJECTIVES	36
2. MATERIALS AND METHODS: AN OVERVIEW	41
2.1 CULTURES EQUIPMENT.....	41
2.2 EXPERIMENTAL SETUP.....	41
2.3 HOW TO CHANGES THE SALINITY.....	42
2.4 HOW TO DECREASE THE TEMPERATURE	43
2.5 SAMPLING.....	44
2.6 ANALYSIS	44
2.6.1 CELL DENSITY AND CARBON BIOMASS	44
2.6.2 CHL-A CONCENTRATION.....	44
2.6.3 DMSP AND DMSO CONCENTRATIONS	44
3. RESPONSE OF DIMETHYLSULFONIOPROPIONATE (DMSP) AND DIMETHYLSULFOXIDE (DMSO) CELL QUOTAS TO SALINITY AND TEMPERATURE SHIFTS IN THE SEA-ICE DIATOM <i>FRAGILARIOPSIS CYLINDRUS</i>	47
3.1 INTRODUCTION	49
3.2 MATERIALS AND METHODS.....	51
3.2.1 CULTURE CONDITIONS	51
3.2.2 ANALYSES	53
3.3 RESULTS	55
3.3.1 CONTROL CULTURES (CONSTANT SALINITY : S34, CONSTANT TEMPERATURE : T = 4°C)	55
3.3.2 INCREASE OF SALINITY (AT CONSTANT TEMPERATURE: T = 4°C)	56
3.3.3 INCREASE OF SALINITY ASSOCIATED WITH A DECREASE OF TEMPERATURE.....	57
3.3.4 DECREASE OF SALINITY (AT CONSTANT TEMPERATURE, T = 4°C)	57
3.4 DISCUSSION.....	60
3.4.1 DMSP AND DMSO IN POLAR OCEANIC CONDITIONS (CONTROL CULTURES).....	60
3.4.2 DMSP AND DMSO IN RESPONSE TO SALINITY ONLY SHIFTS	61
3.4.3 DMSP AND DMSO IN RESPONSE TO COVARIATION OF SALINITY AND TEMPERATURE	63
3.5 ACKNOWLEDGMENT.....	63

4. DIMETHYLSULFONIOPROPIONATE (DMSP) AND DIMETHYLSULFOXIDE (DMSO) CELL QUOTAS VARIATIONS DUE TO SEA ICE SHIFTS OF SALINITY AND TEMPERATURE IN THE PRYMNESIOPHYCEAE <i>PHAEOCYSTIS ANTARCTICA</i>.....	67
4.1 <i>INTRODUCTION</i>	69
4.2 <i>MATERIALS AND METHODS</i>	71
4.2.1 CULTURE CONDITIONS	71
4.2.2 ANALYSES	72
4.3 <i>RESULTS</i>	74
4.3.1 CONTROL CULTURE (CONSTANT SALINITY: S34, CONSTANT TEMPERATURE: T = 4°C)	74
4.3.2 INCREASE OF SALINITY (AT CONSTANT TEMPERATURE: T = 4°C)	75
4.3.3 INCREASE OF SALINITY ASSOCIATED WITH A DECREASE IN TEMPERATURE	76
4.3.4 DECREASE OF SALINITY (AT CONSTANT TEMPERATURE, T = 4°C)	77
4.4 <i>DISCUSSION</i>	80
4.4.1 GROWTH AND DSC CELL QUOTAS IN POLAR OCEANIC CONDITIONS (CONTROL CULTURE).....	80
4.4.2 IMPACT OF SALINITY ON GROWTH AND DSC CELL QUOTAS AT A CONSTANT TEMPERATURE	80
4.4.3 IMPACT OF COVARIATION OF TEMPERATURE AND SALINITY ON GROWTH AND DSC CELL QUOTAS	82
4.4.4 ESTIMATION OF NATURAL DSC BRINES CONTENTS FROM LABORATORY CULTURE EXPERIMENTS	82
4.5 <i>CONCLUSION</i>	88
4.6 <i>ACKNOWLEDGMENTS</i>	89
4.7 <i>SUPPLEMENTARY MATERIALS</i>	89
5. HIGH DMSO CONCENTRATIONS DURING AN ANTARCTIC LANDFAST SEA ICE BLOOM: A RESPONSE TO HIGH OXIDATIVE CONDITIONS?	93
5.1 <i>INTRODUCTION</i>	95
5.2 <i>MATERIALS AND METHODS</i>	97
5.2.1 STUDY AREA AND SAMPLING STRATEGY	97
5.2.2 MICROALGAL COMMUNITIES DYNAMICS.....	98
5.2.3 DSC DYNAMICS	99
5.2.4 ENVIRONMENTAL PARAMETERS.....	100
5.3 <i>RESULTS</i>	101
5.3.1 ATMOSPHERIC FORCING AND GENERAL ICE CONDITIONS	101
5.3.2 MICROALGAL COMMUNITIES DYNAMICS.....	102
5.3.3 DSC DYNAMICS WITH A FOCUS ON DMSO AND BOTTOM ICE CONCENTRATIONS	103
5.3.4 CHANGES IN ENVIRONMENTAL PARAMETERS	107
5.4 <i>DISCUSSION</i>	108
5.4.1 HIGH DMSO CONCENTRATIONS IN BOTTOM ICE.....	108
5.4.2 STRONG INCREASE OF DMSO DOMINANCE IN THE DSC POOL DURING THE SEASONAL BLOOM.....	109
5.4.3 BACTERIAL AND PHOTO-OXIDATION OF SEA ICE DMS (DISSOLVED DMSO POOL)	109
5.4.4 INTRACELLULAR PRODUCTION OF DMSO BY SEA ICE MICROALGAE (PARTICULAR DMSO POOL)	111
5.4.5 POTENTIAL OXIDATIVE STRESS INDUCED BY THE ALGAL BLOOM	111
5.5 <i>CONCLUSION AND PERSPECTIVES</i>	112
5.6 <i>ACKNOWLEDGMENTS</i>	113
5.7 <i>SUPPLEMENTARY MATERIALS</i>	114

6. VARIABILITY IN SULFUR ISOTOPE COMPOSITION SUGGESTS UNIQUE DIMETHYLSULFONIOPROPIONATE CYCLING AND MICROALGAE METABOLISM IN ANTARCTIC SEA ICE	117
6.1 <i>INTRODUCTION</i>	119
6.2 <i>METHODS</i>	121
6.2.1 <i>SAMPLING</i>	121
6.2.2 <i>DMSP AND SULFATE CONCENTRATIONS AND $\Delta^{34}\text{S}$ ANALYSIS.</i>	121
6.2.3 <i>ANCILLARY PARAMETERS</i>	123
6.2.4 <i>CELL CULTURES</i>	124
6.3 <i>RESULTS</i>	125
6.3.1 <i>OVERALL VARIABILITY OF SEA ICE DMSP $\Delta^{34}\text{S}$.</i>	125
6.3.2 <i>DMSP $\Delta^{34}\text{S}$ VARIABILITY BETWEEN SEASONS AND ACROSS ICE HORIZONS.</i>	125
6.3.3 <i>SULFUR ISOTOPE SIGNATURE OF SEA ICE SO_4.</i>	127
6.3.4 <i>VARIABILITY IN DMSP $\Delta^{34}\text{S}$ IN CELL CULTURES EXPERIMENTS.</i>	128
6.4 <i>DISCUSSION</i>	131
6.5 <i>ACKNOWLEDGEMENTS AND AUTHOR CONTRIBUTIONS</i>	134
6.6 <i>SUPPLEMENTARY MATERIALS</i>	135
7. PREDICTION OF SEA ICE DMSP PROFILES.....	141
7.1 <i>GENERAL DESIGN</i>	142
7.1.1 <i>DATA SET</i>	142
7.1.2 <i>LABORATORY EXPERIMENTS</i>	142
7.1.3 <i>CALCULATION APPROACH</i>	143
7.2 <i>DMSP CALCULATIONS WITH AND WITHOUT CONSIDERING THE VARIATION OF SALINITY IN SEA ICE</i>	143
7.3 <i>DEPTH ANALYSIS OF CALCULATED DMSP PROFILES</i>	145
7.4 <i>CONCLUSIONS</i>	148
8. DISCUSSION AND PERSPECTIVES	153
8.1 <i>DMSP AND DMSO AS OSMOREGULATOR FOR THE POLAR MICROALGAE</i>	153
8.2 <i>DMSP AND DMSO IN A CRYOPROTECTANT CELLULAR FUNCTION IN MICROALGAE</i>	155
8.3 <i>TAXONOMY AS AN ADDITIONAL DRIVER OF SEA ICE DSC DYNAMICS</i>	156
8.4 <i>LIMITS AND PERSPECTIVES</i>	158
9. BIBLIOGRAPHY	163
