

TABLE OF CONTENTS

1. INTRODUCTION	16
1.1. CIRRHOSIS AND PORTAL HYPERTENSION	16
1.1.1. Clinical Presentation	17
1.1.2. Staging and Diagnosis of Chronic liver Disease and Portal Hypertension	18
1.1.3. Hepatic Venous Pressure Gradient Assessment.....	21
1.1.4. MELD and Child–Pugh Classification	22
1.1.5. Management of Portal Hypertension.....	24
1.2. ACUTE VARICEAL BLEEDING	28
1.2.1. Epidemiology of AVB.....	29
1.2.2. Physiopathology of AVB.....	30
1.2.3. Location of Varices	31
1.2.4. Size of Varices.....	32
1.2.5. Role of Endoscopy in the Diagnosis and Grading of Varices	34
1.2.5.1. Esophagogastroduodenoscopy (EGD).....	34
1.2.5.2. Endoscopic Ultrasound (EUS).....	36
1.2.5.3. Capsule Endoscopy (CE)	37
1.2.6. Initial Management of the Acute Bleeding Episode.....	38
1.2.7. Blood Volume Restitution	39
1.2.8. Antibiotic Prophylaxis.....	40
1.2.9. Pharmacological Treatment.....	41
1.2.9.1. Timing of endoscopic hemostasis	43
1.2.9.2. Endoscopy Management of Acute Variceal Bleeding	44
1.2.9.3. Endoscopic management of bleeding gastric varices	48
1.2.9.4. Salvage Therapy after Failure of Endoscopic Hemostasis	48
1.2.10. Balloon Tamponade	49
1.2.11. Use of Self-Expandable Metal Stents	49
1.2.12. Transjugular intrahepatic portosystemic shunt (TIPS)	50
1.2.13. Promising Treatment Modality	51
2. AIM OF THE STUDY	54

2.1.	Assessing the feasibility and safety of the hemostatic powder in acute esophageal variceal bleeding.	54
2.2.	Assessing the efficacy and safety of the hemostatic powder in acute variceal bleeding in combination with SOC medical and endoscopic treatment.	54
2.3.	Evaluating the impact of the hemostatic powder as an add on therapeutic modality in combination with SOC medical and endoscopic treatment compared to the SOC alone.	54
3.	THE RESEARCH STUDIES.....	56
3.1.	Endoscopic treatment of acute variceal hemorrhage by using hemostatic powder TC-325: A prospective pilot study.	56
3.2.	Management of acute variceal bleeding using Hemostatic powder.	58
3.3.	Early application of hemostatic powder added to standard management for esophagogastric variceal bleeding. A randomized trial.	61
3.4.	Active bleeding caused by portal hypertensive gastropathy	63
3.5.	Novel application of Hemospray to achieve hemostasis in post-variceal banding esophageal ulcers that are actively bleeding.....	64
3.6.	New developments in managing variceal bleeding	65
4.	DISCUSSION, PERSPECTIVES AND RECOMMENDATION	67
5.	REFERENCES	78
