

Table of Contents

Abstract	i
Resume	iii
Acknowledgement.....	v
Chapter 01 - Introduction.....	1
1.1 Overview	1
1.2 Tectonics and volcanism in the Philippines.....	4
1.3 State of the Art.....	4
1.3.1 What is a hydrothermal system?.....	4
1.3.2 Immature hydrothermal system	7
1.3.3 Mature hydrothermal system	9
1.3.4 Composition of fluids	9
1.3.5 Isotopic composition	13
1.3.5.1 Sulfur isotopes.....	13
1.3.5.2 Deuterium and oxygen isotopes	14
1.4 Volcano monitoring.....	16
1.5 Objectives of the study	18
Chapter 02 - Methods.....	20
2.1 Sample collection	20
2.2 Analytical work	22
2.2.1 High-performance ion -exchange chromatography.....	22
2.2.2 Inductively Coupled Plasma- Optical Emission Spectrometry	23
2.2.3 Elemental Analysis-Isotope Ratio Mass Spectrometry	24
Chapter 03 – Geochemical studies of thermal waters from Kanlaon Volcano, Negros Islands, Philippines.....	26
Abstract.....	26
3.1 Introduction	28
3.2 Volcano tectonic setting and previous work.....	28
3.3 Eruptive history of Kanlaon Volcano	29
3.4 Sampling and analytical methods	31
3.5 Results	33
3.5.1 Composition of thermal waters	33
3.5.2 Sulfur isotopic composition of thermal waters.....	34
3.5.3 Alteration minerals at Mambucal	36
3.6 Discussion.....	36
3.6.1 Origin of thermal waters.....	36

3.6.2 Behavior of Iron (Fe _{tot}) and Aluminum (Al ³⁺) in the hydrothermal system	43
3.6.3 Mineral saturation state of Kanlaon thermal waters	44
3.6.4 Temporal variation in springs at Kanlaon Volcano.....	46
3.6.5 Proposed geochemical model of the magmatic-hydrothermal system of Kanlaon Volcano.....	48
3.7 Conclusion.....	49
Chapter 04 – The magmatic-hydrothermal system of Biliran Volcano, Biliran Province, Philippines...	50
4.1 Introduction	50
4.2 Geologic setting and eruptive history	51
4.3 Previous work.....	54
4.4 Methods	55
4.4.1 Sample locations.....	55
4.4.2 Field measurements.....	55
4.4.3 Analytical techniques	55
4.5 Results	59
4.6 Discussion.....	63
4.6.1 Origin of the different hydrothermal springs in Biliran Volcano	63
4.6.2 Application of Na-K-Mg-Ca geothermometers.....	68
4.6.3 Isotopic composition of the hydrothermal springs	70
4.6.3.1 Sulfur isotopes.....	70
4.6.3.2 Hydrogen and Oxygen isotopes.....	72
4.7 Proposed geochemical model of the magmatic-hydrothermal system of Biliran Volcano	74
4.8 Conclusions and recommendations	77
Chapter 05 – Major element composition of the springs at Mt. Bulusan, Sorsogon Province, Philippines.....	79
5.1 Introduction	79
5.2 Background.....	81
5.2.1 Geologic setting.....	81
5.2.2 History of Bulusan Volcanic Complex (BVC).....	81
5.2.3 Eruptive history of Mt. Bulusan	82
5.3 Previous work.....	85
5.4 Methods	87
5.4.1 Samples and measurements.....	87
5.4.2 Analytical techniques	87
5.5 Results	87
5.6 Discussion.....	90
5.6.1 Origin of the hydrothermal springs in Mt. Bulusan.....	90

5.6.2 Saturation Index	95
5.7 Proposed geochemical model of the magmatic-hydrothermal system of Mt. Bulusan.....	98
5.8 Conclusion	98
Chapter 06 – General Conclusion.....	101
References.....	104
Appendix A – List of Figures	117
Appendix B – List of Tables.....	123
