

# 1 TABLE OF CONTENTS

---

|   |     |
|---|-----|
| 2 INTRODUCTION.....   | 3   |
| 2.1 The skin .....  | 3   |
| 2.1.1 Role and Structure .....  | 3   |
| 2.2 The interfollicular epidermis .....   | 4   |
| 2.2.1 Structure .....   | 4   |
| 2.2.2 Embryonic development and stratification .....  | 6   |
| 2.3 Modelling stem cell fate decision in epidermis .....  | 15  |
| 2.4 The post-natal development.....   | 20  |
| 2.5 The wound repair.....   | 21  |
| 3 OPEN QUESTIONS.....   | 29  |
| 4 RESULTS.....  | 30  |
| 4.1 Defining stem cell dynamics and migration during wound healing in mouse skin epidermis..... | 30  |
| 4.1.1 Focus.....  | 30  |
| 4.1.2 Methods and results.....  | 31  |
| 4.1.3 Conclusion .....  | 32  |
| 4.2 Defining the design principles of skin epidermis postnatal growth .....                     | 67  |
| 4.2.1 Focus.....  | 67  |
| 4.2.2 Methods and results.....  | 67  |
| 4.2.3 Conclusion .....  | 70  |
| 5 DISCUSSION .....  | 153 |
| 5.1 Defining stem cell dynamics and migration during wound healing in mouse skin epidermis..... | 153 |
| 5.1.1 Compartmentalization during wound healing .....   | 153 |
| 5.1.2 Wound healing signature.....  | 154 |
| 5.1.3 Proliferation and migration during wound healing .....                                    | 158 |
| 5.1.4 Clonal dynamics during wound healing .....  | 161 |
| 5.2 Defining the design principles of Skin epidermis postnatal growth.....                      | 166 |
| 5.2.1 Clonal dynamics during postnatal development .....  | 166 |
| 5.2.2 Transcriptional profiling of epidermal progenitors.....                                   | 170 |
| 5.2.3 Cell division orientation and collagen fibers .....                                       | 176 |
| 6 PERSPECTIVES .....  | 177 |
| 6.1 Wound repair.....   | 177 |

|     |                              |     |
|-----|------------------------------|-----|
| 6.2 | Post-natal development ..... | 182 |
| 7   | CONCLUSION.....              | 186 |
| 8   | REFERENCES .....             | 188 |
