

Table of contents

Table of contents.....	4
List of abbreviations	6
I. <u>Introduction</u>.....	8
1. Immunity	8
1.1. Innate immunity.....	8
1.2. Innate immune cells	9
1.2.1. Granulocytes.....	10
1.2.2. Dendritic cells.....	10
1.2.3. Innate lymphoid cells.....	11
1.2.4. Monocytes/Macrophages	12
1.3. Adaptive immunity.....	12
2. The liver	14
2.1. Cellular components of the liver	15
2.1.1. Hepatocytes.....	15
2.1.2. Liver sinusoidal endothelial cells	16
2.1.3. Hepatic Stellate cells	17
2.1.4. Kupffer cells	19
2.1.5. Natural killer cells (NK cells).....	23
2.1.6. NKT cells	25
2.1.7. Dendritic cells.....	26
2.1.8. Conventional T lymphocytes.....	28
2.1.9. $\gamma\delta$ T Lymphocytes	29
3. Primary liver cancers.....	30
3.1. Cholangiocarcinoma	31
3.2. Hepatocellular Carcinoma.....	32
4. Liver regeneration	34
4.1. Clinical implications of liver regeneration.....	38
5. Cytokines	40
5.1. Tumor Necrosis Factor-α.....	40
5.1.1. Complex I.....	41
5.1.2. ComplexIIa/b.....	42
5.1.3. Necrosome.....	43

5.1.4. Inflammation and tumorigenesis	45
5.2. Interleukin-6	46
5.3. Interleukin-1 β	50
5.3.1. Inflammasome and pyroptosis.....	52
II. <u>Research objectives</u>	55
III. <u>Results</u>	56
1. Experimental set-up and models	56
1.1. Model of hepatectomy.....	56
1.2. Choice of tumoral model.....	57
2. Hepatocarcinoma induces a tumor necrosis factor-dependent Kupffer cell death pathway that favors its proliferation upon partial hepatectomy	59
3. Complementary observations.....	61
3.1. Liver regeneration in IL-6 KO mice.....	61
3.2. Rejection of the tumor is impaired in CD3 KO mice.....	62
3.3. Liver regeneration in Batf3 KO mice.....	62
3.4. Positive control staining of p-MLKL (Ser345).....	63
IV. <u>Discussion</u>	64
1. Tumor development model.....	64
2. Impact of liver regeneration on tumoral growth/tumor rejection	66
3. Nature of Kupffer cells disappearance following PH	69
4. IL-6 importance for Kupffer cells survival and tumor rejection	72
5. Tumor growth modifies partial hepatectomy-induced death of KC	74
6. Differential recruitment of monocyte-derived cells is dictated by death pathway activation in KC	77
7. Possible clinical applications	79
8. Dendritic cells and liver regeneration	81
9. Kupffer cells potential interactions with other cells.....	83
V. <u>Bibliography</u>	85
VI. <u>Summary</u>	104
