

Summary:

1 Introduction	6
1.1 Ocular abnormalities in Down syndrome	8
1.1.1 Iris abnormalities	9
1.1.2 Refractive errors	11
1.1.3 Strabismus	11
1.1.4 Accommodation	11
1.1.5 Nystagmus	12
1.1.6 Lens disorders	13
1.1.7 Corneal disorders	13
1.1.8 Visual acuity	14
1.1.9 Posterior segment abnormalities	14
1.2 Down syndrome phenotype	17
1.2.1 Down syndrome physical dysmorphism	18
1.2.2 Congenital anomalies associated with Down syndrome	19
1.2.3 Cognitive impairment in Down syndrome	21
1.3 Pathological conditions that are more prevalent in Down syndrome	23
1.3.1 Respiratory diseases	24
1.3.2 Cardiovascular events	25
1.3.3 Gastrointestinal diseases	25
1.3.4 Renal and urinary tract diseases	26
1.3.5 Immune disturbances	27
1.3.6 Autoimmune diseases	28
1.3.7 Endocrine diseases	29
1.3.8 Growth and obesity	30

1.3.9	Premature ageing	31
1.3.10	Other health problems more prevalent in Down syndrome	32
1.3.11	Psychiatric disorders	33
1.3.12	Cancer	33
1.4	Angiogenesis	34
1.4.1	Regulation of angiogenesis	36
1.4.2	Physiological and pathological processes influenced by angiogenesis	36
1.4.3	Angiogenesis in Down syndrome	37
2	Aims of the thesis and its hypothesis	41
2.1	Clinical study I – Paper I	43
2.2	Clinical study II – Paper II	43
2.3	Clinical study II – Paper III	44
2.4	Clinical study III – Paper IV (manuscript in preparation)	45
3	List of Papers	46
3.1	Introduction to Paper I	47
	Paper I: “Brushfield spots and Wölfflin nodules unveiled in dark irides using near-infrared light”	49
3.2	Introduction to Paper II	55
	Paper II: “Abnormalities of the optic nerve in Down syndrome and associations with visual acuity”	56
3.3	Introduction to Paper III	69
	Paper III: “Illustration of tessellation in Down syndrome”	70
3.4	Introduction to Paper IV	81
	Paper IV : “An interventional, controlled study to correlate optic	

disc vascular anomalies, serum angiogenic factors, and renal anomalies in children with Down syndrome”	83
4 Methods	141
4.1 Subjects	141
4.2 Settings	142
4.3 Clinical examinations	142
4.3.1 Ocular imaging	143
4.3.1.1 Ocular anterior segment photography (Paper I)	143
4.3.1.2 Ocular posterior segment photography (Papers II, III, IV)	144
4.3.2 Assessment of ocular images	144
4.3.2.1 Ocular anterior segment photography (Paper I)	144
4.3.2.2 Ocular posterior segment photography (Paper II, III, IV)	145
4.4 Informed consent	148
4.5 Statistical analysis	149
5 Discussion	152
5.1 Ocular anomalies	152
5.1.1 Iris particularities	152
5.1.2 Refractive errors	154
5.1.3 Strabismus	155
5.1.4 Accommodation	156
5.1.5 Nystagmus	156
5.1.6 Corneal and lens disorders	157
5.1.7 Posterior segment	158
5.1.7.1 Abnormalities of the optic nerve head	158
5.1.7.2 Tessellation of the fundus in Down syndrome	159

5.1.8 Visual acuity in children with Down syndrome	160	160
5.1.9 Retinal vascular pattern in relation to the optic nerve head		161
5.2 General health status of children with Down syndrome		161
5.3 Angiogenesis in Down syndrome		163
5.4 Renal anomalies in Down syndrome		165
5.5 Correlations between clinical and molecular findings		165
5.6 Limitations of the study		166
6 General conclusions		168
7 Future perspectives		170
References		172
