

Table of contents

Chapter I: General Introduction	1
1 Supramolecular chemistry.....	1
2 Transmembrane transport	2
2.1 <i>Model membranes and methodologies</i>	3
2.2 <i>Chloride transport with synthetic systems – state of the art</i>	6
3 Outline of the thesis	18
4 References	20
Chapter II: Transmembrane transport of chloride and organic ion pairs with calix[6]arene-based receptors	29
1 Introduction.....	29
2 Calixarenes and transport.....	29
3 Development of the NMR methodology used.....	34
3.1 <i>NMR and paramagnetic compounds</i>	34
3.2 <i>Setting up of NMR methodologies</i>	36
4 Summary of published results	39
5 Additional data	42
6 Conclusions.....	45
7 Materials and methods.....	47
7.1 <i>Synthesis of H₈DOTP</i>	47
7.2 <i>Synthesis of calixarene 12</i>	49
7.3 <i>Synthesis of calixarene 13</i>	50
8 References	55

Chapter III: Binding of chloride to receptors embedded in lipid membranes 61

1	Introduction.....	61
2	Binding studies with liposomes and micelles by ^1H and ^{31}P NMR	63
2.1	<i>State of the art.....</i>	63
2.2	<i>Results and discussions.....</i>	66
3	^{35}Cl NMR binding studies with liposomes and micelles.....	71
3.1	<i>Chemical exchange effects.....</i>	73
3.2	<i>^{35}Cl NMR to monitor chloride binding in aqueous media</i>	75
3.3	<i>State of the art.....</i>	77
3.4	<i>Results and discussions.....</i>	78
4	Conclusions.....	96
5	Materials and methods.....	98
5.1	<i>Materials.....</i>	98
5.2	<i>^1H NMR titrations</i>	98
5.3	<i>^{35}Cl NMR titrations.....</i>	99
5.4	<i>ITC experiments</i>	100
6	References.....	102

Chapter IV: Conclusions 107

Chapter V: Appendices..... 111

1	Publication in Angewandte Chemie – International Edition.....	111
2	Appendices to Chapter III	143
2.1	<i>Binding studies with liposomes and micelles by ^1H and ^{31}P NMR.....</i>	143
2.2	<i>Binding studies with liposomes by ^{35}Cl NMR</i>	149
