DE MÉDECINE

UNIVERSITÉ LIBRE DE BRUXELLES

**Contribution of myeloid HO-1 to the modulation of
renal ischemia-reperfusion injury**
Effect of myeloid HO-1 induction with hemin as a preemptive treatment
strategy against renal ischemia-reperfusion injury

Thesis submitted by Maxime ROSSI, MD

in fulfilment of the requirements of the PhD Degree in “Docteur en Sciences Médicales”

Academic year 2020-2021

Supervisor: Professor Alain Le Moine
Co-supervisor: Professor Véronique Flamand
Institute for Medical Immunology

Thesis jury:

Pr Michel Braun (Université libre de Bruxelles, Chair)
Pr Alain Le Moine (Université libre de Bruxelles, Secretary)
Pr Véronique Flamand (Université libre de Bruxelles)
Pr Xavier De Deken (Université libre de Bruxelles)
Pr Khalid Ismaili (Hôpital universitaire des enfants Reine Fabiola)
Pr Basile Stamatopoulos (Université libre de Bruxelles)
Pr Thierry Hauet (Université de Poitiers)
Pr Diethard Monbaliu (UZ Leuven)

Table of contents

REMERCIEMENTS	- 3 -
LIST OF FIGURES	- 6 -
LIST OF TABLES	- 8 -
ABSTRACT	- 9 -
RESUME	- 11 -
ABBREVIATIONS	- 14 -
INTRODUCTION	- 19 -
I. Kidney: a brief overview	- 19 -
1. Basic anatomy.....	- 19 -
1.1 Location.....	- 19 -
1.2 Microscopic anatomy.....	- 20 -
1.3 Collecting system.....	- 20 -
1.4 Blood supply and microvascularisation.....	- 21 -
2. Comparative kidney anatomy.....	- 23 -
II. Ischemia-reperfusion injury (IRI) and kidney	- 24 -
1. Presentation.....	- 24 -
2. IRI and acute kidney injury (AKI).....	- 25 -
3. Physiopathology of IRI-induced AKI.....	- 28 -
3.1 Endothelial and microvascular dysfunctions in ischemic AKI.....	- 29 -
3.2 Immune response in ischemic AKI.....	- 33 -
3.2.1 Tubular cells and inflammation in ischemic AKI.....	- 34 -
3.2.2 Myeloid cells in ischemic AKI.....	- 36 -
3.2.2.1 Neutrophils in ischemic AKI.....	- 37 -
3.2.2.2 Monocytes/Macrophages in ischemic AKI.....	- 37 -
3.2.2.3 Dendritic cells in ischemic AKI.....	- 45 -
4. Adaptive repair after IRI-induced AKI.....	- 46 -
5. Maladaptive repair after IRI-induced AKI.....	- 48 -
5.1 Maladaptive repair and cell cycle arrest.....	- 49 -
5.2 Maladaptive repair and autophagy disruption.....	- 50 -
5.3 Maladaptive repair and macrophages.....	- 51 -
5.4 Origins of myofibroblasts in renal fibrosis.....	- 51 -
5.4.1 Bone marrow-derived fibrocytes.....	- 52 -
5.4.2 Epithelial-mesenchymal transition (EMT).....	- 53 -
5.4.3 Renal pericytes.....	- 53 -
5.4.4 Macrophage-to-myofibroblast transition (MMT).....	- 53 -
6. Remote organ damage in IRI-induced AKI.....	- 54 -
6.1 Kidney-liver cross-talk.....	- 55 -
6.2 Kidney-heart cross-talk.....	- 55 -
6.3 Kidney-brain cross-talk.....	- 55 -
6.4 Kidney-intestine cross-talk.....	- 56 -
6.5 Kidney-lung cross-talk.....	- 56 -
III. Heme oxygenase-1 (HO-1)	- 57 -
1. Presentation.....	- 57 -
2. Tissue expression.....	- 58 -
3. Subcellular localization.....	- 58 -
4. Genetics and regulation of HO-1 expression.....	- 59 -
4.1 Hmox1 gene structure.....	- 59 -

4.2 Hmox1 deletion.....	- 60 -
4.3 Hmox1 promoter polymorphisms.....	- 61 -
4.4 Regulation of Hmox1 gene expression.....	- 61 -
4.4.1 Transcriptional factors.....	- 61 -
4.4.2 Signaling cascades.....	- 63 -
4.4.3 MicroRNAs.....	- 64 -
5. Modulation of HO-1 expression.....	- 64 -
5.1 Natural HO-1-inducing compounds.....	- 64 -
5.2 Pharmaceutical HO-1-inducing compounds.....	- 65 -
5.3 Cell-derived HO-1-inducing mediators.....	- 65 -
5.4 Heavy metals HO-1-inducing compounds.....	- 65 -
6. Cytoprotective effects of HO-1.....	- 66 -
6.1 Antioxidant effect of HO-1.....	- 66 -
6.2 Antiapoptotic effect of HO-1.....	- 67 -
7. Effects of HO-1 on immune system.....	- 68 -
7.1 Anti-inflammatory effect of HO-1.....	- 68 -
7.2 HO-1 and macrophage polarization.....	- 70 -
8. HO-1 and renal IRI.....	- 70 -
AIM OF THE WORK.....	- 72 -
RESULTS.....	- 73 -
1. HO-1 mitigates AKI and subsequent kidney-lung cross-talk.....	- 73 -
2. Specific expression of HO-1 by myeloid cells modulates renal IRI.....	- 74 -
3. Dual effect of hemin on renal IRI.....	- 75 -
DISCUSSION.....	- 76 -
1. HO-1 and kidney-lung cross-talk following renal IRI.....	- 76 -
2. Myeloid cells are critical for HO-1 cytoprotective effects.....	- 77 -
2.1 Myeloid HO-1 modulates macrophage polarization.....	- 78 -
2.2 The origin of HO-1 ⁺ myeloid cells.....	- 79 -
3. Myeloid HO-1 modulates adaptive renal repair after AKI.....	- 80 -
4. Hemin-mediated protection against AKI is time-dependent.....	- 82 -
5. Hemin preconditioning: a novel nephron sparing strategy.....	- 83 -
6. Hemin-induced HO-1 therapy: a polymorphism dependency.....	- 84 -
PERSPECTIVES.....	- 86 -
1. Characterization of HO-1 ⁺ CD11b ⁺ F4/80 ^{lo} macrophages.....	- 86 -
2. Deciphering the role of HO-1 in macrophage polarization.....	- 86 -
3. Determining the origin of HO-1 ⁺ myeloid cells.....	- 87 -
4. Understanding the microenvironment between HO-1 ⁺ myeloid cells and RTECs.....	- 88 -
CONCLUSIONS.....	- 89 -
MATERIALS AND METHODS.....	- 91 -
REFERENCES.....	- 98 -
