Introduction	10
1 Unbundling political and economic rationality: a non-parametric approach tested on transport infrastructure in Spain	26
1.1 Introduction	26
1.2 Some historical context	30
1.3 Methodology and data	32
1.3.1 Model	34
1.3.2 Data	36
1.4 Efficiency analysis	37
1.4.1 Technical efficiency	37
1.4.2 Scale efficiency	42
1.4.3 The big picture	44
1.5 Concluding remarks	46
Appendices	48
2 On the effects of the private financial ownership of regulated utilities: lessons from the UK water sector	54
2.1 Introduction	54
2.2 Background	57
2.2.1 Institutional context	57
2.2.2 Regulatory context	60
2.2.3 Industry-specific issues	61
2.3 Research question and theoretical framework	62
2.4 Data and variables	64
2.4.1 Leverage levels and average consumer bills	64
2.4.2 Socio-economic and financial controls	69
2.5 Empirical strategy	69

2.5.1	Identification strategy - <i>The leverage effect</i>	70
2.5.2	Identification strategy - <i>The consumer bill effect</i>	72
2.6	Results	73
2.6.1	Impact of de-listing on leverage levels	73
2.6.2	Impact of leverage levels on average consumer bills	75
2.6.3	Robustness	77
2.7	Concluding remarks	77
Appendices		79
2.A	Water leaks	79
2.B	Parallel trends assumption	80
2.C	Treatment lead	81
3	How effective has the electricity social rate been in reducing energy poverty in Spain?	82
3.1	Introduction	82
3.1.1	Energy poverty	85
3.1.2	Energy poverty in Spain	86
3.1.3	The social electricity rate in Spain (BSE)	89
3.2	Data and descriptive statistics	89
3.2.1	Data	89
3.2.2	Energy poverty and other outcome variables	90
3.2.3	Treatment variable	91
3.2.4	Control variables	94
3.3	Empirical strategy	94
3.3.1	Empirical framework	94
3.3.2	Difference-in-differences model	96
3.4	Results	98
3.4.1	The impact of the <i>BSE</i> on energy poverty	98
3.4.2	Mechanisms	100
3.5	Robustness checks	105
3.5.1	Alternative measures of energy poverty	105
3.5.2	The effect of BSE on income poverty	108
3.5.3	Comparability of the treatment and control groups: Sample restriction to households whose main source of income is pension	110
3.5.4	Discussion on potential biases	111
3.6	Policy evaluation	113
3.7	Conclusions	114
Appendices		117
3.A	Data cleaning process	117

3.B	Eligibility to BSE: Identification of the criteria of minimum pension	119
3.C	Description of control variables	121
3.D	Descriptive statistics: hidden energy poverty	122
3.E	Sensitivity analysis to the energy poverty threshold	123
Bibliography		124
