

FACULTÉ  
DE PHARMACIE

UNIVERSITÉ LIBRE DE BRUXELLES

# Valorisation of Compounds with High Nutritional Value from Cocoa By-Products as Food Ingredients and Additives

**Thesis presented by Olga ROJO POVEDA**

with a view to obtaining the PhD Degree in Biomedical and Pharmaceutical Sciences (ULB - “Docteur en Sciences Biomédicales et Pharmaceutiques”) and in Agricultural, Forestry and Food Sciences (UniTo)

Academic year 2020-2021

Supervisors: Professor Caroline STÉVIGNY (Université libre de Bruxelles)

RD3 Department-Unit of Pharmacognosy, Bioanalysis and Drug Discovery

and Professor Giuseppe ZEPPA (Università degli Studi di Torino)

Department of Agriculture, Forestry and Food Sciences (DISAFA)

## Thesis jury:

Chiara CORDERO (Università degli Studi di Torino, Chair)

Stéphanie POCHET (Université libre de Bruxelles, Secretary)

Vera LAVELLI (Università degli Studi di Milano)

Giorgia SPIGNO (Università Cattolica del Sacro Cuore)

Giuseppe ZEPPA (Università degli Studi di Torino, Supervisor)

Caroline STÉVIGNY (Université libre de Bruxelles, Supervisor)

<b>Acknowledgements</b> .....	<b>i</b>
<b>Table of contents</b> .....	<b>iii</b>
<b>Abbreviations</b> .....	<b>v</b>
<b>Abstract</b> .....	<b>vii</b>
<b>GENERAL INTRODUCTION</b> .....	<b>1</b>
1. The cocoa bean shell .....	3
2. Nutritional and chemical composition .....	5
2.1. Proximate composition – Moisture, ashes, proteins, fats and carbohydrates .....	5
2.2. Dietary fiber.....	8
2.3. Phenolic compounds.....	9
2.4. Methylxanthines .....	11
2.5. Minerals and vitamins .....	12
3. Applications .....	13
3.1. Food applications.....	13
3.2. Utilization as feedstuffs .....	14
3.3. Uses in industry and other applications .....	16
4. Biofunctionality and potential health benefits .....	17
4.1. Antibacterial activity and anticariogenic effects .....	18
4.2. Antiviral properties.....	22
4.3. Action on cardiovascular health .....	22
4.4. Anticarcinogenic action.....	23
4.5. Antidiabetic activity .....	23
4.6. Other biofunctional properties.....	24
5. Safety aspects .....	25
5.1. Heavy metals .....	25
5.2. Mycotoxins .....	26
<b>CONTEXT AND AIMS OF THE WORK</b> .....	<b>29</b>

<b>RESULTS AND DISCUSSION .....</b>	<b>33</b>
PART 1 – COCOA BEAN SHELL CHARACTERIZATION .....	35
CHAPTER 1.1: Determination of polyphenolic profile by RP-HPLC-PDA analysis and spectrophotometric assays for the chemometric classification of cocoa bean shells .....	37
CHAPTER 1.2: Assessment of volatile fingerprint by HS-SPME/GC-qMS and E-nose for the classification of cocoa bean shells using chemometrics.....	79
CHAPTER 1.2.1: Analytical dataset on volatile compounds of cocoa bean shells from different cultivars and geographical origins .....	107
PART 2 – COCOA BEAN SHELL-BASED FUNCTIONAL FOODS .....	117
CHAPTER 2.1: Effects of particle size and extraction methods on cocoa bean shell functional beverage .....	119
CHAPTER 2.2: <i>In vitro</i> bioaccessibility and functional properties of phenolic compounds from enriched beverages based on cocoa bean shell .....	147
CHAPTER 2.3: Physical properties and consumer evaluation of cocoa bean shell functionalized biscuits adapted for diabetic consumers by the replacement of sucrose with tagatose .....	169
CHAPTER 2.4: Polyphenolic and methylxanthine bioaccessibility of cocoa bean shell functional biscuits: metabolomics approach and intestinal permeability through Caco-2 cell models .....	191
PART 3 – CBS APPLICATIONS WITH PHARMACEUTICAL APPROACH .....	223
CHAPTER 3.1: Evaluation of cocoa bean shell antimicrobial activity with a metabolomic approach for tentative active compound identification.....	225
<b>GENERAL CONCLUSION AND PERSPECTIVES .....</b>	<b>241</b>
<b>BIBLIOGRAPHY .....</b>	<b>245</b>
