Contents

1. Cosmic Rays & Multimessenger Astronomy **1**
- 1.1. Cosmic ray observation . . . 1
- 1.2. Cosmic ray acceleration . . . 9
- 1.3. Cosmic ray propagation . . . 14
- 1.4. Cosmic ray reactions in the accelerator . . . 16
- 1.5. Gamma rays as messengers from p-γ collisions . . . 18
- 1.6. Neutrinos as messengers from p-γ collisions . . . 19
- 1.7. Multimessenger principle . . . 20
- 1.8. Current multimessenger efforts . . . 22

2. Neutrino Astronomy with IceCube **27**
- 2.1. Detection Principle . . . 28
- 2.2. Construction and geometry . . . 34
- 2.3. The DOM . . . 37
- 2.4. Data processing . . . 39
- 2.5. Real-time alerts . . . 43
- 2.6. Simulation . . . 47
- 2.7. Ice properties . . . 48

3. Neutrino Data **55**
- 3.1. Noise cleaning and event splitting . . . 58
- 3.2. Reconstruction . . . 59
- 3.3. Coordinate systems . . . 66
- 3.4. Calibration . . . 67
- 3.5. Event selection . . . 70

4. Gamma-ray Astronomy with Fermi-LAT **73**
- 4.1. Gamma-ray astronomy . . . 73
- 4.2. The Fermi-LAT instrument . . . 75
- 4.3. Analysis-level data . . . 79
- 4.4. The Fermi-LAT sky . . . 85

5. Blazars **89**
- 5.1. Active and inactive galaxies . . . 89

5.2. Central engine 90
5.3. Multi-wavelength overview of AGN 91
5.4. High-energy emission from blazars 97
5.5. Blazar classification 102
5.6. Neutrino production 106

6. Gamma-ray Lightcurves **107**
6.1. Lightcurves from aperture photometry 107
6.2. Lightcurves from likelihood fits 110
6.3. Bayesian block smoothing 112

7. Likelihood Method **119**
7.1. Likelihood fit 120
7.2. Data set generation 128
7.3. Likelihood ratio hypothesis test 132

8. TXS 0506+056 **139**
8.1. Context and motivation 139
8.2. Argument for a lightcurve correlation analysis 146
8.3. Analysis 147
8.4. Systematics and checks 150

9. Blazar Flare Stacking **155**
9.1. Source list 156
9.2. Analysis method 162
9.3. Systematics and checks 169

10. Results **173**
10.1. TXS 0506+056 173
10.2. Blazar flare stacking 179
10.3. Discussion 188

11. Conclusions & Outlook **195**
11.1. Conclusions 195
11.2. More analysis targets 196
11.3. Other data 197

A. Supplementary Figures **199**

B. Source Lists **205**
B.1. BL Lacs 205
B.2. FSRQs 207
B.3. TXS 0506+056 211

Acronyms **213**

Bibliography **217**
