INDEX OF TABLES.....	-17-
LIST OF ARTICLES INCLUDED IN THIS THESIS.....	-18-
ABSTRACT.....	-19-

1. INTRODUCTION 1

1.1 Context.....	1
1.1.1 The Orchidaceae: what a diversity!	1
1.1.2 Among the Angraecinae: <i>Tridactyle</i>	3
1.1.3 Biogeography of orchids: the paradox	8
1.1.4 What about African orchids?	11
1.1.5 Africa geography and biodiversity: the CVL region and the GGI	12
1.2. Goal of Research	22
1.2.1 Research Context	22
1.2.2 Objectives and work hypotheses	23
1.2.2.1 General and Specific Objectives	23
1.2.2.2 Hypotheses.....	24

2. CHAPTER 1: TAXONOMICAL ISSUES WITHIN THE *TRIDACTYLE-CYRTORCHIS* CLADE AND THE GENUS *TRIDACTYLE*. 27

2.1 An elegy to <i>Rangaeris</i>, including a description of two new genera in the <i>Cyrtorchis–Tridactyle</i> clade (Orchidaceae, Angraecinae)	27
2.1.1 Abstract.....	27
2.1.2 Introduction	28
2.1.3 Material and Methods	30
2.1.3.1 Taxon sampling for molecular analyses	30
2.1.3.2 DNA extraction, amplification and sequencing	31
2.1.3.3 Phylogenetic analyses	32
2.1.3.4 Morphological study.....	33
2.1.4 Results.....	34
2.1.4.1 Molecular phylogenetics	34
2.1.4.2 Morphological survey	38
2.1.4.3 Taxonomic treatment.....	40
2.1.4.3.1 Key to genera in <i>Cyrtorchis–Tridactyle</i> alliance and <i>Solenangis</i>	40
2.1.4.3.2 <i>Podangis</i> redefined	41
2.1.4.3.3 Key to <i>Podangis</i>	42
2.1.4.3.4 New genera	46
2.1.5 Acknowledgments	59
2.2 Molecular phylogeny and taxonomic synopsis of the angraecoid genus <i>Ypsilopus</i> (Orchidaceae, Vandaeae)	61
2.2.1 Abstract.....	61
2.2.2 Introduction	62
2.2.3 Materials and Methods	63

2.2.3.1 Taxon sampling.....	63
2.2.3.2 DNA amplification and sequencing	64
2.2.3.3 Alignment and phylogenetic analyses	65
2.2.3.4 Indel coding and analysis.....	66
2.2.3.5 Morphological study.....	66
2.2.4 Results.....	67
2.2.4.1 Phylogenetic analyses	67
2.2.4.2 Analyses with indels	70
2.2.4.3 Morphological survey.....	73
2.2.5 Discussion	75
2.2.5.1 Taxonomic treatment.....	77
2.2.5.1.1 A new infrageneric classification of <i>Ypsilopus</i>	78
2.2.5.1.2 Key to <i>Ypsilopus</i> and allied genera.....	78
2.2.5.1.3 Key to sections and species of <i>Ypsilopus</i>	79
2.2.6 Author contributions	83
2.2.7 Acknowledgments	83
2.3 Novelties among East African angraecoids (Orchidaceae, Angraecinae)	84
2.3.1 Abstract.....	84
2.3.2 Introduction	85
2.3.3 Material and Methods	86
2.3.4 Results.....	87
2.3.4.1 Key to species of <i>Tridactyle</i> from East Africa and the Albertine Rift.....	87
2.3.4.2 Key to species of <i>Ypsilopus</i> sect. <i>Ypsilopus</i> (amended from D'hajjère et al. (2019))	93
2.3.5 Discussion	99
2.3.6 Declarations	101
2.4 Synopsis of <i>Tridactyle</i> (Orchidaceae: Epidendroideae: Vandaeae: Angraecinae) in São Tomé and Príncipe, with the description of four new species.....	102
2.4.1 Abstract.....	102
2.4.2 Introduction	102
2.4.3 Material and Methods	104
2.4.4 Results.....	105
2.4.4.1 Key to the <i>Tridactyle</i> species from São Tomé and Príncipe.....	105
2.4.4.2 Taxonomic Treatment	105
2.4.5 Acknowledgments	127
3. CHAPTER 2: BIOGEOGRAPHY OF <i>TRIDACTYLE</i> ON THE GULF OF GUINEA ISLANDS.....	129
3.1 Diversification of the orchid genus <i>Tridactyle</i>: origin of endemism on the oceanic islands of São Tomé and Príncipe in the Gulf of Guinea.	129
3.1.1 Abstract.....	129
3.1.2 Introduction	130
3.1.3 Materials and Methods	134
3.1.3.1 Taxon sampling.....	134
3.1.3.2 DNA extraction, genomic libraries and Illumina sequencing.....	135
3.1.3.3 Chloroplast and ribosomal genome assembly, annotation and structure	135
3.1.3.4 Phylogenetic inference and divergence time estimation	136
3.1.3.5 Ancestral areas estimation	138
3.1.4 Results.....	138
3.1.4.1 Molecular datasets and phylogenetic relationships.....	139
3.1.4.2 Dating and biogeography	141
3.1.5 Discussion	143

3.1.5.1 Biogeographical history of <i>Tridactyle</i> in the Gulf of Guinea.....	144
3.1.6 Conclusions	146
3.1.7 Acknowledgments	147
4. CHAPTER 3: INTRASPECIFIC VARIATION AND PHYLOGEOGRAPHY OF <i>TRIDACTYLE TRIDACTYLITES</i> IN ATLANTIC CENTRAL AFRICA.....	150
4.1 Phylogeography of the epiphyte orchid <i>Tridactyle tridactylites</i> (Rolfe) Schltr. in Atlantic Central Africa: The importance of the Gulf of Guinea archipelago in the rainforest biodiversity	150
4.1.1 Introduction	150
4.1.2 Materials and Methods	153
4.1.2.1 Study species and study area	153
4.1.2.2 DNA extraction and capture of the plastome and ribosomal regions.....	156
4.1.2.3 Chloroplast and ribosomal genome assembly and SNP calling	157
4.1.2.4 Population genetic parameters at geographic population level	158
4.1.2.5 Approximate Bayesian computation analyses with DIYABC	158
4.1.3 Results.....	162
4.1.3.1 Chloroplast and ribosomal genome assembly and SNP calling	162
4.1.3.2 Population genetics	162
4.1.3.3 Modelling of demographic scenarios and estimating times of divergence.....	165
4.1.4 Discussion	167
4.1.4.1 Recent colonisation of Upper and Lower Guinea by <i>T. tridactylites</i> from Príncipe	167
4.1.4.2 Study limits	169
4.1.5 Conclusions	169
5. DISCUSSION.....	170
5.1 The Art in Taxonomy: know your frame	170
5.2 <i>Tridactyle</i> in the GGI, an underestimated diversity.....	171
5.3 The importance of new tools for Phylogeny	174
5.4 Phylogeny of <i>Tridactyle</i> and the congruence of methods.	177
5.5 Importance of vegetative characters within <i>Tridactyle</i>	185
5.6 Biogeography in Africa and the GGI, age estimation and comparison with other plants	189
5.7 Phylogenetic of <i>Tridactyle tridactylites</i> : the north/south genetic discontinuity in Central Africa concern also epiphytic herbs with long-distance dispersal capacities, and the importance of Príncipe	197
6. CONCLUSIONS AND PERSPECTIVES	202
6.1 Conclusions	202
6.1.1 Taxonomical issues within the <i>Tridactyle-Cyrtorchis</i> clade	202
6.1.2 Phylogeny and Systematic of <i>Tridactyle</i>	202
6.1.3 Biogeography of <i>Tridactyle</i> on São Tomé and Príncipe	203
6.1.4 Geographical distribution of the genetic variation of <i>Tridactyle tridactylites</i> in Atlantic Central Africa.....	203
6.2 Perspectives	204
