Contents

1 Introduction **1**
- 1.1 Vibration of bladed structures . . . 2
- 1.2 Damping of bladed structures . . . 5
  - 1.2.1 Passive damping . . . 5
  - 1.2.2 Active damping . . . 10
  - 1.2.3 Hybrid damping . . . 14
- 1.3 Motivations and Contributions . . . 17
- 1.4 Outlines . . . 18

2 Passive Electromagnetic Shunt Damper **21**
- 2.1 Mathematical modeling . . . 22
- 2.2 Optimization based on maximum damping method . . . 23
- 2.3 Optimization based on maximum power dissipation . . . 27
- 2.4 Digital electromagnetic shunt damper . . . 30
  - 2.4.1 Introduction to digital shunt system . . . 30
  - 2.4.2 Power consumption for an OpAmp . . . 30
- 2.5 Conclusions . . . 34

3 Active Vibration Control **35**
- 3.1 Resonant force feedback control system . . . 36
  - 3.1.1 Mathematical model and analysis . . . 36
  - 3.1.2 Maximum damping optimization of the absorber . . . 40
  - 3.1.3 H_∞ optimization of the absorber . . . 46
  - 3.1.4 Control effort . . . 50
  - 3.1.5 Stability and Robustness analysis . . . 54
- 3.2 Positive position feedback control system . . . 56
  - 3.2.1 Mathematical modeling and H_2 optimization . . . 56
  - 3.2.2 Influence of the PPF parameters . . . 60
  - 3.2.3 Experimental validation . . . 64
- 3.3 Nonlinear Positive Position Feedback (NPPF) . . . 67
  - 3.3.1 A review of modeling and H_∞ optimization . . . 68
  - 3.3.2 Experimental validation . . . 69
- 3.4 PPF vs Digital Shunt . . . 75
- 3.5 Conclusions . . . 77

4 Hybrid Vibration Control **79**
- 4.1 Hybrid electromagnetic shunt damper with an active voltage source . . . 80
- 4.2 Hybrid electromagnetic shunt damper with an active current source . . . 82
- 4.3 Powerflow analysis . . . 85

4.4 Robustness analysis . . . 87
4.5 Conclusions . . . 88

5 Vibration Control of Bladed Structures 91
5.1 The BluM . . . 92
5.1.1 Dynamics of the BluM . . . 92
5.1.2 Optimal location of piezoelectric patches . . . 94
5.1.3 Experimental validation of piezoelectric locations . . . 98
5.2 The bladed rail . . . 98
5.2.1 Numerical modeling of the bladed rail . . . 99
5.2.2 Vibration control of the bladed rail . . . 103
5.2.3 Experimental result . . . 108
5.3 Conclusions . . . 110

6 Summary and Future works 111
6.1 Summary . . . 111
6.2 Future works . . . 112

A The Parseval's theorem 115
A.1 A practical example . . . 115

B H_∞ optimization of linear and nonlinear positive position feedback (PPF) 119
B.1 H_∞ optimization of linear PPF controller . . . 119
B.2 H_∞ optimization of nonlinear PPF controller . . . 122
B.3 Performance of the NPPF controller . . . 124
