# Table of Contents

|   |      |
|---|------|
| List of Abbreviations .....                                 | XI   |
| List of Figures .....                                       | XIV  |
| List of Tables.....   | XVII |
| I. Introduction.....  | 1    |
| 1. Overview of T lymphocyte .....                           | 2    |
| 1.1 Development of T lymphocytes .....                      | 2    |
| 1.2 TCR structure .....                                     | 6    |
| 1.3 V(D)J recombination.....                                | 7    |
| 2. T lymphocyte activation .....                            | 13   |
| 2.1 Antigen presentation to T cells .....                   | 14   |
| 2.2 TCR-CD3 complex and T cell signaling .....              | 17   |
| 2.3 Co-stimulation of T cells .....                         | 18   |
| 2.4 Clonal expansion of T cells.....                        | 20   |
| 2.5 Differentiation of CD4+ T cells .....                   | 21   |
| 2.6 CTL cells .....   | 25   |
| 2.7 Memory T cell development .....                         | 26   |
| 3. Immune tolerance.....                                    | 27   |
| 3.1 Central T cell tolerance.....                           | 28   |
| 3.2 Peripheral T cell tolerance .....                       | 29   |
| 3.3 Regulatory T cells.....                                 | 29   |
| 3.4 tTregs and TCR signaling in tTregs development.....     | 30   |
| 3.5 Aire in the generation of tTregs .....                  | 34   |
| 3.6 Development of pTregs .....                             | 36   |
| 3.7 FOXP3: a master regulator of Treg cells .....           | 38   |
| 3.8 Function of FOXP3 <sup>+</sup> regulatory T cells ..... | 40   |
| 4. Immunology of pregnancy .....                            | 42   |
| 4.1 Stages of pregnancy .....                               | 42   |

---

|  |    |
|--|----|
| 4.2 The maternal-fetal interface.....  | 45 |
| 4.3 The immune system in the maternal-fetal interface.....                                     | 46 |
| 4.4 Systemic immunity during pregnancy.....  | 52 |
| 4.5 Maternal to fetal tolerance.....   | 54 |
| 4.6 Sex hormone.....   | 57 |
| 4.7 Microbes and infections during pregnancy.....  | 59 |
| 4.8 Microchimerism and fetal/neonatal to maternal tolerance.....                               | 60 |
| II. Aim of the study.....  | 66 |
| III. Material and Method.....  | 68 |
| 1. Mice.....   | 69 |
| 2. Cell isolation and purification.....  | 69 |
| 2.1 Purification of CD4 <sup>+</sup> T cells and CD4 <sup>+</sup> CD25 <sup>+</sup> Tregs..... | 70 |
| 2.2 Purification of T cells.....   | 70 |
| 2.3 Isolation lymphocytes from blood.....  | 70 |
| 3. Cell culture medium.....  | 71 |
| 3.1 Mixed lymphocyte reaction.....   | 71 |
| 3.2 Stimulation by anti-CD3.....   | 72 |
| 4. Cytokine secretion assays.....  | 72 |
| 5. 2W1S immunization model and LPS inflammation model.....                                     | 73 |
| 6. Flow cytometry and cell sorting.....  | 73 |
| 6.1 Extracellular staining.....  | 74 |
| 6.2 Measuring lymphocyte proliferation with CFSE labeling.....                                 | 75 |
| 6.3 Intranuclear staining of FOXP3, Ki-67 and HA-tag.....                                      | 75 |
| 6.4 Intracytoplasmic staining of IL-2.....   | 75 |
| 6.5 pMHCII Tetramer-Based staining and enrichment.....   | 76 |
| 7. Western bolt.....   | 76 |
| 8. Analysis gene expression by quantitative PCR.....   | 77 |
| 8.1 RNA extraction.....  | 77 |

---

|  |     |
|--|-----|
| 8.2 Reverse transcription and quantitative PCR.....  | 78  |
| 9. High Throughput Sequencing of TRB repertoire.....   | 79  |
| 9.1 TCR $\beta$ -chain library preparation .....   | 79  |
| 9.2 Sequencing of TCR- $\beta$ repertoire and bioinformatics analysis.....   | 80  |
| 10. Single-cell RNA sequencing .....   | 80  |
| 10.1 scRNA-Seq library preparation for 5' Gene Expression (GEX) and<br>VDJ sequencing .....  | 81  |
| 10.2 Single-cell RNA-seq analysis .....  | 81  |
| 11. Generation of TdT transgenic mice.....   | 82  |
| 11.1 Plasmid construction.....   | 82  |
| 11.2 Micro-injection .....   | 83  |
| 11.3 Identification of TdT transgenic mice .....   | 83  |
| 12. Statistical analysis. ....   | 84  |
| IV. Result .....   | 85  |
| 1. Developmental exposure to maternal antigen stimulates the expansion of<br>specific FOXP3 <sup>+</sup> Tregs .....                                 | 86  |
| 2. NIMA-Specific FOXP3 <sup>+</sup> Tregs have a less diverse TCR repertoire and are<br>phenotypically distinct from self-specific Tregs.....        | 88  |
| 3. Production of transgenic mice carrying TdT constructs .....   | 94  |
| 4. TdT tg mouse have abnormal thymic T cell subset.....  | 98  |
| 5. TdT tg mouse have normal peripheral T cell subsets. ....  | 99  |
| 6. Forced TdT expression before birth resulted in a diverse TCR repertoire   | 102 |
| 7. Forced TdT expression alters self-antigen-specific Treg frequency.....  | 105 |
| 8. Immunization in neonates stimulates the development of antigen-specific<br>effector T cells .....   | 107 |
| 9. Inflammation at birth promotes the development of NIMA-specific effector T<br>cells and prevents the development of NIMA-specific tolerance ..... | 109 |
| V. Discussion and perspectives .....   | 116 |
