

Experimental and numerical investigation of slurry flows in pipelines: a contribution towards slush propellants for future rockets' engines.

Thesis submitted by Maria Teresa SCELZO

in fulfilment of the requirements of the PhD Degree in Engineering Sciences (“Docteur en Sciences de l’Ingenieur et Technologie”).

Academic year 2020-2021

Supervisor: Professor Alessandro PARENTE

Co-supervisors: Professor Jean-Marie BUCHLIN

Professor Delphine LABOUREUR

von Karman Institute for fluid dynamics

Thesis jury:

Prof. Benoit Haut (Université libre de Bruxelles, Chair)

Prof. Delphine Laboureux (von Karman Institute, Secretary)

Prof. Gérard Degrez (Université libre de Bruxelles)

Dr. Richard Schwane (ESA-European Space Research and Technology Centre)

Prof. Johan Steelant (ESA- European Space Research and Technology Centre)

Ir. Laura Peveroni (von Karman Institute)
