Summary	i
Résumé	iii
Acknowledgements	v
1 Introduction and main results of this thesis	1
1.1 The Graph Minor Theorem	2
1.2 Applications of the Graph Minor Theorem	4
1.2.1 Isometric Embeddings	5
1.2.2 Cut Dominants	7
1.3 Ball packings	8
1.4 Contributions of the thesis	10
1.4.1 Isometric embeddings	10
1.4.2 Cut dominants	12
1.4.3 Ball packings	13
2 Basic notions about graphs and polyhedra	15
2.1 Graphs	15
2.2 Polyhedra	19
3 Isometric embeddings	21

3.1	Euclidean dimension	29
3.2	Alternative view of ℓ_∞ -dimension	33
3.3	Metric tools	34
3.4	Certificates of large ℓ_∞ -dimension	40
3.5	2-connected graphs	46
3.5.1	Contracted SPQR trees	47
3.5.2	Extending flat sets in 2-connected graphs	50
3.5.3	Handling several 2-cutsets simultaneously	54
3.6	3-connected graphs	58
3.7	Finishing the proof	76
3.8	Minimal excluded Minors for ℓ_∞ -dimension 3	80
4	Cut Dominants	81
4.1	General results about facets of cut dominants and $\varphi(G)$	85
4.2	Bounding $\varphi(G)$ as a function of $\tau(G)$	90
4.3	Some minimal excluded minors for $\varphi(G) \leq 4$	92
4.3.1	Internally 3-connected graphs	93
4.3.2	Not internally 3-connected graphs	94
4.4	Properties of minimal excluded minors for $\varphi(G) \leq 4$	95
4.5	Amplifiers	115
4.6	Further research directions	120
5	Ball packings	123
5.1	Proof idea and content of the chapter	126
5.2	Hypergraphs, balls, and minors	129
5.3	Hypergraphs and density	134
5.4	Fractional packings of balls	136
5.5	Linear bound	139
5.6	Conclusion	141

Bibliography	145
A Excluded minors for ℓ_∞^3	153
