| Abstract   | iii   |
| Resum v  |       |
| Résumé viii  |       |
| Acknowledgements   | xi    |
| List of Figures .....  | xvi   |
| List of Tables .....   | xviii |
| Thesis Details   | xix   |
| 1 Introduction   | 1     |
| 1 Background and Motivation .....                                      | 1     |
| 2 The NoSQL Systems and Document Stores .....                          | 3     |
| 3 Data Design for Document Stores .....                                | 5     |
| 3.1 State of the Art and Challenges .....                              | 8     |
| 4 Structure of the Thesis .....  | 12    |
| 5 Thesis Overview .....  | 13    |
| 5.1 On the Performance Impact of Using JSON, Beyond Impedance Mismatch | 13    |
| 5.2 Managing Polyglot System Metadata with Hypergraphs                 | 14    |
| 5.3 A Cost Model for Random Access Queries in Document Stores          | 16    |
| 5.4 Automated Database Design for Document Stores .....                | 17    |
| 6 Contributions .....  | 18    |
| 2 On the Performance Impact of Using JSON, Beyond Impedance Mismatch   | 21    |
| 1 Introduction .....   | 22    |
| 2 Related Work .....   | 23    |
| 3 Representational Differences .....                                   | 24    |
| 3.1 Schema variability .....   | 24    |
| 3.2 Schema declaration .....   | 25    |
| 3.3 Structure complexity .....   | 26    |
| 4 Experimental evaluation .....  | 28    |
| 4.1 Schema variability .....   | 29    |
| 4.2 Schema declaration .....   | 31    |
| 4.3 Structure complexity .....   | 32    |
| 5 Discussion .....   | 34    |
| 3 Managing Polyglot Systems Metadata with Hypergraphs                  | 36    |
| 1 Introduction .....   | 37    |
| 2 Preliminaries .....  | 38    |
| 2.1 Resource Description Framework (RDF) .....                         | 38    |
| 2.2 SOS Model .....  | 39    |
| 3 Formalization .....  | 40    |
| 4 Metadata Management .....  | 44    |
| 4.1 Query Representation .....   | 46    |
| 4.2 Constraints and Transformation Rules on Data Stores .              | 47    |
| 5 Calculating Statistical and Storage Metadata .....                   | 50    |
| 5.1 Storage size estimation .....                                      | 51    |
| 5.2 Physical access patterns for workloads .....                       | 53    |
| 6 Use Case .....   | 55    |
| 7 Related Work .....   | 57    |
| 4 A cost model for random access queries in document stores            | 60    |
| 1 Introduction .....   | 61    |
| 2 Background and Related Work .....                                    | 63    |
| 3 Formalization of the Cost Model .....                                | 66    |
| 3.1 Generic Component .....  | 67    |

|   |     |
|---|-----|
| 3.2 Specific Component . . . . .  | 71  |
| 4 Applying the cost model . . . . .   | 76  |
| 4.1 Couchbase Server (THP) . . . . .  | 76  |
| 4.2 MongoDB (TDSL) . . . . .  | 78  |
| 5 Experiments . . . . .   | 80  |
| 5.1 Couchbase Server . . . . .  | 81  |
| 5.2 MongoDB . . . . .   | 82  |
| 5.3 Accuracy of Prediction . . . . .  | 87  |
| 5.4 Comparison to Other Approaches . . . . .  | 88  |
| 5 Automated Database Design for Document Stores with Multi-criteria Optimization                | 89  |
| 1 Introduction . . . . .  | 90  |
| 2 Related Work . . . . .  | 92  |
| 3 Overview . . . . .  | 94  |
| 3.1 User Inputs . . . . .   | 95  |
| 3.2 Design Processes . . . . .  | 96  |
| 3.3 Loss Function . . . . .   | 96  |
| 3.4 Search Algorithm . . . . .  | 97  |
| 4 Canonical Model . . . . .   | 99  |
| 4.1 Immutable Graph . . . . .   | 100 |
| 4.2 Storage-Agnostic Constructs . . . . .   | 102 |
| 4.3 Document Store-Specific Constructs . . . . .  | 104 |
| 5 Design Processes Over the Canonical Model . . . . .   | 105 |
| 5.1 Random Design Generation . . . . .  | 105 |
| 5.2 Design transformations . . . . .  | 108 |
| 6 Experiments . . . . .   | 112 |
| 6.1 Quality of the Design . . . . .   | 112 |
| 6.2 Scalability of the Approach . . . . .   | 114 |
| 6.3 Threats to Validity . . . . .   | 116 |
| 6 Conclusions and Future Directions   | 118 |
| 1 Conclusions . . . . .   | 118 |
| 2 Future Directions . . . . .   | 121 |
| Appendices  | 122 |
| A DocDesign: Cost-Based Database Design for Document Stores                                     | 123 |
| 1 Introduction . . . . .  | 124 |
| 2 DocDesign . . . . .   | 126 |
| 2.1 Design Alternatives . . . . .   | 127 |
| 2.2 Canonical Representation . . . . .  | 127 |
| 2.3 Query Workload . . . . .  | 128 |
| 2.4 Estimating the Runtime . . . . .  | 128 |
| 3 Demonstration Overview . . . . .  | 129 |
| 4 Conclusion . . . . .  | 130 |
| B DocDesign 2.0: Automated Database Design for Document Stores with Multi-criteria Optimization | 132 |
| 1 Introduction . . . . .  | 133 |
| 2 DocDesign 2.0 in a nutshell . . . . .   | 136 |
| 2.1 User Inputs . . . . .   | 136 |
| 2.2 Design Operations . . . . .   | 138 |
| 2.3 Optimization . . . . .  | 139 |
| 3 Demonstration Overview . . . . .  | 140 |
| C Calculating Internal B-tree Blocks  | 142 |

|  |     |
|--|-----|
| D Cost Calculation Examples for MongoDB                    | 143 |
| 1 Single Collection with Primary Index                     | 143 |
| 2 Multiple Collections                                     | 145 |
| E Algorithm to build hyperedges from connected components  | 148 |
| F Formalized transformations                               | 150 |
| G Validation of operations against MongoDB Design Patterns | 152 |
